Retirement Board of San Joaquin
County Employees' Retirement Association
6 South El Dorado Street, Suite 400
Stockton, CA 95202

Dear Members of the Board:

At your request, we have conducted an actuarial valuation of the San Joaquin County Employees' Retirement Association (SJCERA, the System, the Fund, the Plan) as of January 1, 2023. This report contains information on the System's assets and liabilities and discloses employer and employee contribution levels. It also contains schedules for inclusion in the Actuarial Section of the Annual Financial Report. Your attention is called to the Executive Summary in which we refer to the general approach employed in the preparation of this report.

The purpose of this report is to present the results of the annual actuarial valuation of SJCERA. This report is for the use of the Retirement Board of SJCERA and its auditors in preparing financial reports in accordance with applicable law and accounting requirements.

Cheiron's report was prepared solely for the Retirement Board of SJCERA for the purposes described herein, except that the plan auditor may rely on this report solely for the purpose of completing an audit related to the matters herein. Other users of this report are not intended users as defined in the Actuarial Standards of Practice, and Cheiron assumes no duty or liability to any other user.

This report and its contents have been prepared in accordance with generally recognized and accepted actuarial principles and practices and our understanding of the Code of Professional Conduct and applicable Actuarial Standards of Practice set out by the Actuarial Standards Board as well as applicable laws and regulations. Furthermore, as credentialed actuaries, we meet the Qualification Standards of the American Academy of Actuaries to render the opinion contained in this report. This report does not address any contractual or legal issues. We are not attorneys, and our firm does not provide any legal services or advice.

Sincerely,
Cheiron

Graham A. Schmidt, ASA, EA, FCA, MAAA
Consulting Actuary

**SAN JOAQUIN COUNTY EMPLOYEES' RETIREMENT ASSOCIATION
ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

SECTION I – EXECUTIVE SUMMARY

Cheiron has performed the actuarial valuation of the San Joaquin County Employees' Retirement Association as of January 1, 2023. The valuation is organized as follows:

- In Section I, the **Executive Summary**, we describe the purpose of an actuarial valuation, summarize the key results found in this valuation and disclose important trends.
- The **Main Body** of the report presents details on the System's
 - Section II – Identification and Assessment of Risks
 - Section III – Assets
 - Section IV – Liabilities
 - Section V – Contributions
 - Section VI – Additional Financial Report Schedules
- In the **Appendices**, we conclude our report with detailed information describing plan membership (Appendix A), actuarial assumptions and methods employed in the valuation (Appendix B), a summary of pertinent plan provisions (Appendix C), a 401(h) repayment schedule (Appendix D), a glossary of key actuarial terms (Appendix E), a summary of General and Safety Employer contribution rates (Appendix F), and tables containing member contribution rates (Appendix G).

Future results may differ significantly from the current results presented in this report due to such factors as the following: plan experience differing from that anticipated by the assumptions; changes in assumptions; and, changes in plan provisions or applicable law.

Cheiron utilizes ProVal actuarial valuation software leased from Winklevoss Technologies (WinTech) to calculate liabilities and project benefit payments. We have relied on WinTech as the developer of ProVal. We have a basic understanding of ProVal and have used ProVal in accordance with its original intended purpose. We have not identified any material inconsistencies in assumptions or output of ProVal that would affect this valuation.

Deterministic and stochastic projections in this valuation report were developed using R-scan, a proprietary tool used to illustrate the impact of changes in assumptions, methods, plan provisions, or actual experience (particularly investment experience) on the future financial status of the Plan. R-scan uses standard roll-forward techniques that implicitly assume a stable active population. Because R-scan does not automatically capture how changes in one variable affect all other variables, some scenarios may not be consistent.

In preparing our report, we relied on information (some oral and some written) supplied by the SJCERA staff. This information includes, but is not limited to, plan provisions, employee data, and financial information. We performed an informal examination of the obvious characteristics of the data for reasonableness and consistency in accordance with Actuarial Standard of Practice No. 23.

**SAN JOAQUIN COUNTY EMPLOYEES' RETIREMENT ASSOCIATION
ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

SECTION I – EXECUTIVE SUMMARY

The primary purpose of the actuarial valuation and this report is to measure, describe, and identify the following as of the valuation date:

- The financial condition of the System,
- Past and expected trends in the financial progress of the System,
- Employer and employee contribution rates for Plan Year 2024, and
- An assessment and disclosure of key risks.

The information required under GASB standards Nos. 67 and 68 is included in a separate report, with the report for the Plan's Fiscal Year Ending December 31, 2022 provided to SJCERA in May 2023.

In the balance of this Executive Summary, we present (A) the basis upon which this year's valuation was completed, (B) the key findings of this valuation including a summary of key financial results, (C) an examination of the historical trends, and (D) the projected financial outlook for the System.

A. Valuation Basis

This valuation determines the employer contributions for the Plan Year 2024. The System's funding policy is to contribute an amount equal to the sum of:

- The normal cost under the Entry Age Normal Cost Method,
- Amortization of the Unfunded Actuarial Liability (UAL), and
- A portion of the Fund's expected administrative expenses.

The UAL that existed as of 2014 is being amortized over a closed period as a level percentage of payroll, with 10 years remaining as of the current valuation, with the exception of a fixed amount associated with the extraordinary investment loss from 2008, which is amortized as a separate layer with 16 years remaining as of the current valuation. All new unexpected changes in the UAL emerging after 2014 are amortized over 15-year periods, with new amortization layers added each year. The single equivalent amortization period for the aggregate stream of UAL payments is 11 years for General and 12 years for Safety. Tables V-4 and V-5 show a detailed summary of each amortization layer for General and Safety, respectively.

This valuation was prepared based on the plan provisions shown in Appendix C. Tier 2B was created for new members hired after January 1, 2022, which has a more limited definition of pensionable pay than Tier 2 but is identical in all other aspects.

**SAN JOAQUIN COUNTY EMPLOYEES' RETIREMENT ASSOCIATION
ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

SECTION I – EXECUTIVE SUMMARY

B. Key Findings of this Valuation

The key results of the January 1, 2023 actuarial valuation are as follows:

- The actuarially determined employer contribution rate increased from 49.33% to 51.05%.
- The System's funded ratio, the ratio of assets over Actuarial Liability, decreased from 72.4% last year to 72.0% as of January 1, 2023 on an Actuarial Value of Assets (AVA) basis. It decreased from 78.0% to 66.6% on a Market Value of Assets (MVA) basis.
- The Unfunded Actuarial Liability (UAL) is the excess of the System's Actuarial Liability over the Actuarial Value of Assets. The System experienced an increase in the UAL from \$ 1,471,522,356 to \$ 1,589,974,206 as of January 1, 2023.
- During the year ending December 31, 2022, the return on Plan assets was -9.79% on a market value basis, as compared to the 6.75% assumption. This resulted in a market value loss on investments of \$697,238,840. The Actuarial Value of Assets recognizes 20% of the difference between the expected Actuarial Value of Assets and the Market Value of Assets. This method of smoothing the asset gains and losses returned 5.84% on the smoothed value of assets, an actuarial asset loss of \$33,276,439 for the year.
- The Actuarial Value of Assets is currently 108% of the market value. Since actuarial assets are above market assets, there are unrecognized investment losses (approximately \$311 million) that will be reflected in the smoothed value in future years.
- Contributions to the System (excluding the additional voluntary contributions described below) were greater than the actuarial cost for the year due to the 12-month-delay in the implementation of the contribution rates and higher than expected payroll for Safety members. This surplus decreased the UAL by \$685,044.
- The System experienced a loss on the Actuarial Liability of \$161,207,755 primarily due to negotiated pay increases for many bargaining units, as well as higher than expected inflation, which increased current and future expected COLAs for members in pay status.
- During 2022, the Mosquito and Vector Control District (MVCD), the Superior Court of California, and the County of San Joaquin made additional voluntary contributions (above the actuarially determined amount) of \$23,117,567. The total market value of the additional contributions, including prior year amounts and accumulated with interest at the Plan's actual rate of return, was \$193,406,243 as of December 31, 2022. These assets are included in the calculation of the UAL and funded ratio, but under the funding policy requested by the contributors and approved by the Board, these assets are excluded in the calculation of the employer contribution rates.

**SAN JOAQUIN COUNTY EMPLOYEES' RETIREMENT ASSOCIATION
ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

SECTION I – EXECUTIVE SUMMARY

Table I-1 below summarizes all the key results of the valuation with respect to membership, assets and liabilities, and contributions. The results are presented and compared for both the current and prior plan year.

TABLE I-1 Summary of Principal Plan Results			
	January 1, 2022	January 1, 2023	% Change
<u>Participant Counts</u>			
Active Participants	6,329	6,244	-1.34%
Participants Receiving a Benefit	6,542	6,692	2.29%
Terminated Vested Participants	1,114	1,198	7.54%
Terminated Non-Vested Participants	<u>1,385</u>	<u>1,599</u>	15.45%
Total	15,370	15,733	2.36%
Calendar Year Projected Pay	\$ 502,156,998	\$ 534,385,940	6.42%
<u>Assets and Liabilities</u>			
Actuarial Liability (AL)	\$ 5,323,788,814	\$ 5,674,662,702	6.59%
Actuarial Value of Assets (AVA) ¹	<u>3,852,266,458</u>	<u>4,084,688,496</u>	6.03%
Unfunded Actuarial Liability (UAL)	\$ 1,471,522,356	\$ 1,589,974,206	8.05%
Funded Ratio (AVA)	72.4%	72.0%	-0.4%
Funded Ratio (MVA) ²	78.0%	66.6%	-11.4%
Inactive Funded Ratio	68.2%	68.2%	0.0%
<u>Contributions as a Percentage of Payroll</u>			
Normal Cost Rate	14.18%	13.85%	-0.33%
Unfunded Actuarial Liability Rate ³	34.29%	36.36%	2.07%
Administrative Expense	<u>0.86%</u>	<u>0.84%</u>	-0.02%
Total Contribution Rate	49.33%	51.05%	1.72%

¹ Includes additional County, MVCD, and Superior Court Contribution Reserves.

² The Market Value of Assets includes additional County, MVCD, and Superior Court Contribution Reserves.

³ Based on Actuarial Value of Assets that does not include additional County, MVCD, and Superior Court Contribution Reserves.

The Inactive Funded Ratio shown in Table I-1 represents the percentage of the Actuarial Liability attributable to members who are not active employees. A funded ratio of 68.2% or more, for example, would result in a level of assets anticipated to be sufficient to fund the liabilities of the System's inactive members for their expected lifetimes: those currently retired, disabled, terminated with vested benefits, and their beneficiaries.

**SAN JOAQUIN COUNTY EMPLOYEES' RETIREMENT ASSOCIATION
ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

SECTION I – EXECUTIVE SUMMARY

An analysis of the contribution rate changes from the prior valuation reveals the following:

- Contributions were expected to increase as a dollar amount.

Prior to accounting for the asset and liability losses this year, contributions in dollar terms had been expected to increase as a result of payroll growth, both from increases in the normal cost and since the UAL is amortized as a level percentage of payroll.

- Asset experience produced an investment loss on a market basis and on a smoothed basis.

The assets of the Plan returned -9.79% on a market basis, lower than the assumed rate of 6.75%, resulting in a loss for 2022. Under the actuarial asset smoothing policy, 20% of this loss is recognized in the current year, in addition to 20% of the gains and losses from each of the prior three years. The overall return on the smoothed assets was 5.84%; lower than the assumed return of 6.75%, so the overall contribution rate increased by 0.56% of payroll. The contribution rate increased more for Safety members (by 1.03% of payroll) than for General members (0.48% of payroll) as a result of the asset loss; this is due to the fact that the Safety members have a higher ratio of assets to payroll than the General members.

- Contributions greater than the actuarial cost (excluding additional contributions made by the employers) decreased the employer contribution rate by 0.02% of pay, largely due to the 12-month delay in implementation of the contribution rates and a surplus in actual versus projected Safety payroll.
- The demographic experience of the Plan – rates of retirement, death, disability, and termination – increased the overall employer rate by 0.79% of pay.

The demographic losses were largely driven by inflation which led to larger than expected current and future COLAs for members receiving benefits. There were also mortality losses (i.e., fewer deaths than expected) for Safety members, while there were gains for the General members from a greater number of terminations than expected. The net impact of these and other demographic changes was an increase of 0.34% of payroll for the General members and an increase of 2.71% of payroll for Safety members. Similar to the asset experience, part of the reason the Safety members had a larger increase in the contribution rate was due to a higher ratio of liabilities to payroll than the General members.

- Overall pay increases for returning General and Safety members were above expectations.

Salaries for continuing active members increased more than expected due to negotiated pay increases for several bargaining groups, increasing the liabilities associated with benefits already earned (the Actuarial Liability) and the value of benefits expected to be

**SAN JOAQUIN COUNTY EMPLOYEES' RETIREMENT ASSOCIATION
ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

SECTION I – EXECUTIVE SUMMARY

earned this year (the normal cost). Average projected pay for continuing General members increased by over 10% and almost 17% for Safety members. This led to an increase in the employer contribution rate of 1.32% of payroll for General members, 4.75% of payroll for Safety members, and 1.85% of overall payroll, as well as an increase in the expected dollar contribution of nearly \$13 million.

- The unfunded liability is being amortized over a higher-than-expected payroll base for Safety and General members.

The payroll used to amortize the unfunded liability for General and Safety members was higher than expected due to larger than expected payroll growth, driven by the increases in pay described above, somewhat offset by a small (1.3%) reduction in the number of active participants. This resulted in a decrease in the contribution rate of about 0.73% and 5.85% of pay for General and Safety members, respectively.

The aggregate impact from the change in total projected payroll was a decrease in the contribution rate of 1.23% of pay. Note that the change in the payroll base used to amortize the unfunded liability does not change the dollar amount of the contribution – only the contribution rate calculated as a percentage of payroll.

- New members entered the Plan as PEPRA members, with 824 newly hired or rehired members entered the Plan to replace departing members during 2022.

New PEPRA (Tiers 2 and 2B) hires have a smaller Plan normal cost as a percentage of payroll when compared to the legacy (Tier 1) members. Due to the shift in both populations towards more Tier 2 members, the employer contribution rate decreased by 0.21% of payroll for General members, 0.32% of payroll for Safety members, and the overall contribution rate dropped by 0.23% of payroll.

In addition, some bargaining groups have different cost sharing arrangements for their Legacy members. The valuation results reflect the arrangements in place as of the valuation date that apply to the 2024 Plan Year. Changes to the cost sharing arrangements occurring after the valuation date will affect the aggregate employer costs in future valuations.

**SAN JOAQUIN COUNTY EMPLOYEES' RETIREMENT ASSOCIATION
ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

SECTION I – EXECUTIVE SUMMARY

Changes in Funded Ratio

Table I-3 below presents a similar summary of factors affecting the funded ratios from last year to this year, on an actuarial and market basis, with many of the same factors applying. Table I-3 also includes the impact from the additional contributions made by the County and other employers, which are not reflected in the contribution reconciliation, since those assets are not reflected when determining the employer contribution rates.

TABLE I-3		
Summary of Changes in Funded Ratio from Prior Review		
	Actuarial Value of Assets	Market Value of Assets
<u>January 1, 2022</u>	72.4%	78.0%
Change in Funded Ratio Due to:		
Expected Change	2.3%	2.5%
Additional Contributions	0.5%	0.5%
Asset Experience	(1.1%)	(12.5%)
Demographic Experience	(0.7%)	(0.6%)
Salary Experience	(1.4%)	(1.3%)
<u>Funded Ratio as of January 1, 2023</u>	72.0%	66.6%

ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

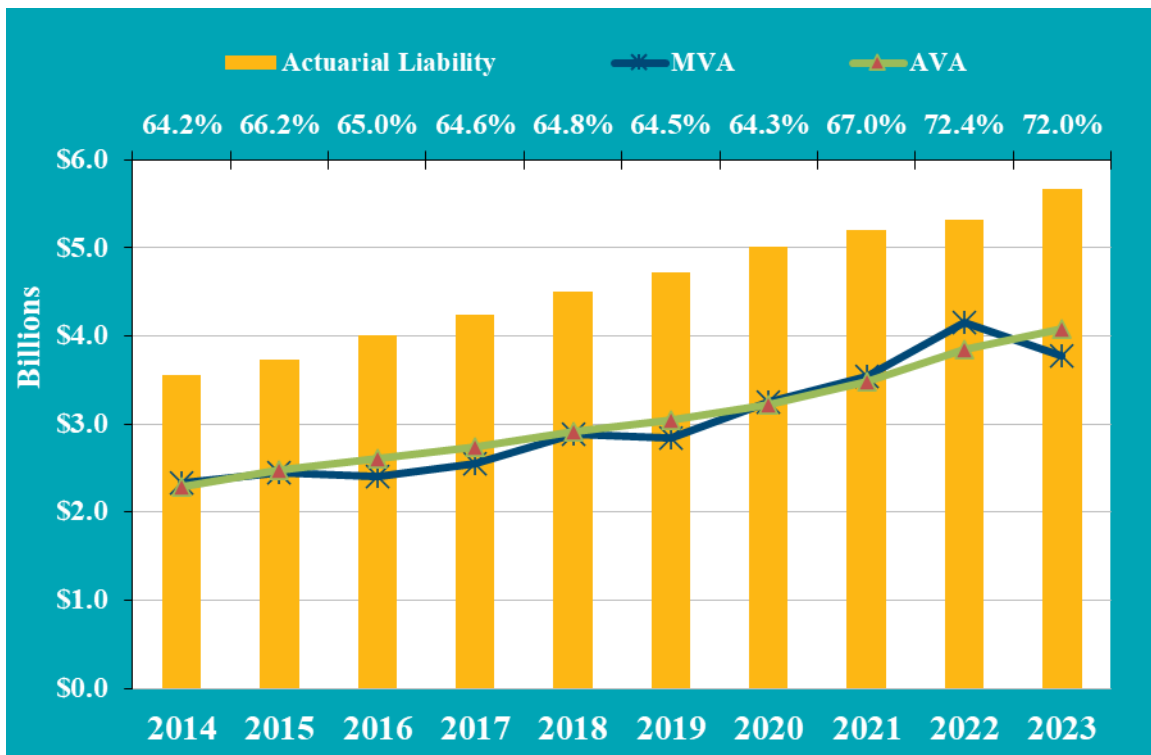

SECTION I – EXECUTIVE SUMMARY

C. Historical Trends

Despite the fact that for most retirement plans the greatest attention is given to the current valuation results and in particular, the size of the current Unfunded Actuarial Liability and the employer contribution, it is important to remember that each valuation is merely a snapshot in the long-term progress of a pension fund. It is more important to judge a current year's valuation result relative to historical trends, as well as trends expected into the future.

Assets and Liabilities

The chart on this page compares the Market Value of Assets (MVA) and Actuarial Value of Assets (AVA) to the Actuarial Liabilities. The percentage shown at the top of each bar is the ratio of the Actuarial Value of Assets to the Actuarial Liability (the funded ratio).

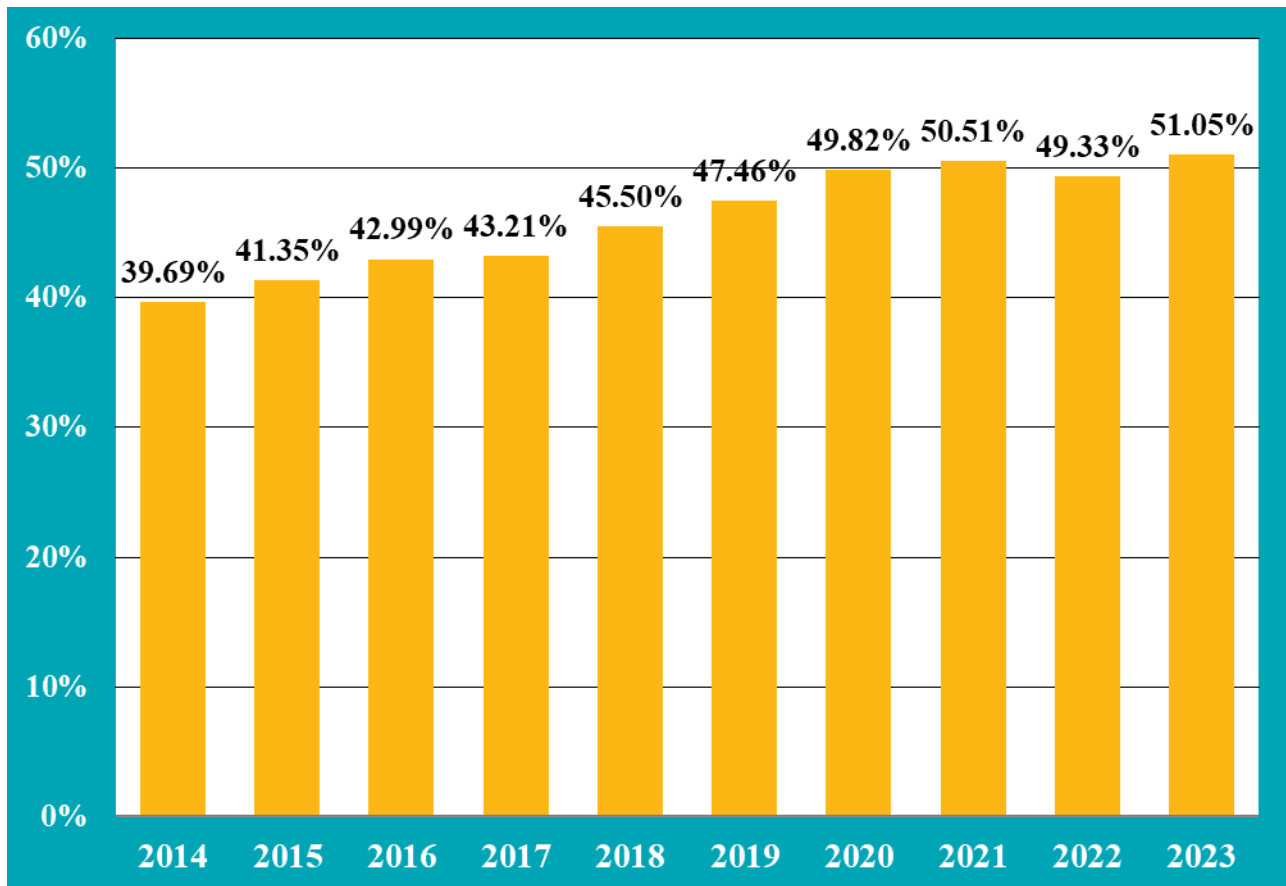

The funded ratio has increased from 64.2% in 2014 to 72.0% in 2023. During the first seven years of the past decade, the funded ratio remained relatively flat, as investment returns lagged expectations and more conservative assumptions were adopted. There were increases in the funded ratio in 2021 and 2022, due to investment returns and contributions made by the employers and members. The funded ratio decreased this year from 72.4% to 72.0%, primarily due to significant actuarial liability losses from higher-than-expected retiree COLAs and salary increases greater than the assumed rates for most bargaining groups, as well as lower than assumed actuarial returns on investments during 2022.

**SAN JOAQUIN COUNTY EMPLOYEES' RETIREMENT ASSOCIATION
ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

SECTION I – EXECUTIVE SUMMARY

Employer Contribution Rates

The chart on this page shows the employer contribution rate for each of the last 10 valuation cycles. The same factors that contributed to the decline and subsequent lack of progress in funded status – i.e., lower returns and assumptions that are more conservative – have resulted in increases in contribution rates. Rates also increased due to growth in payroll lagging behind the assumed growth through 2021, which spread the UAL dollar payment over a smaller payroll base. Weak asset returns and higher-than-expected COLAs and bargained salary increases during 2022 have led to an increase in the contribution rate in the current valuation.

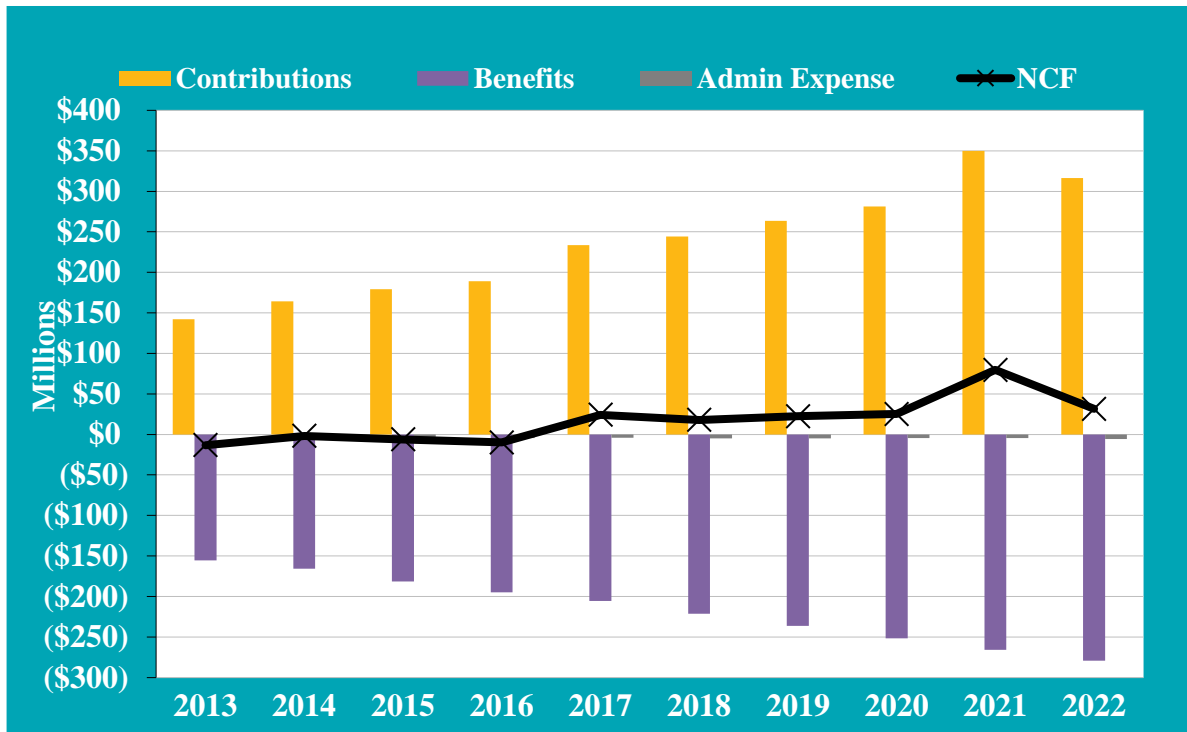

**SAN JOAQUIN COUNTY EMPLOYEES' RETIREMENT ASSOCIATION
ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

SECTION I – EXECUTIVE SUMMARY

Cash Flows

The chart below shows the Plan's net cash flow (NCF) (contributions less benefit payments and administrative expenses). This is an important measure, as it reflects the ability to have funds available to meet benefit payments without having to make difficult investment decisions, especially during volatile markets.

The NCF – shown as the black line in the chart – was slightly negative for the first four years shown in this period but has been positive the past six years due to the increase in the contribution rates and the additional contributions being made by the County and other employers.

The implications of a plan with negative net cash flow are that the impact of market fluctuations can be more severe: as assets are being depleted to pay benefits in down markets, there is less principal available to be reinvested during favorable return periods. If there were a shift to future negative net cash flow, it could magnify the losses during a market decline, hindering the Plan in its ability to absorb market fluctuations.

**SAN JOAQUIN COUNTY EMPLOYEES' RETIREMENT ASSOCIATION
ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

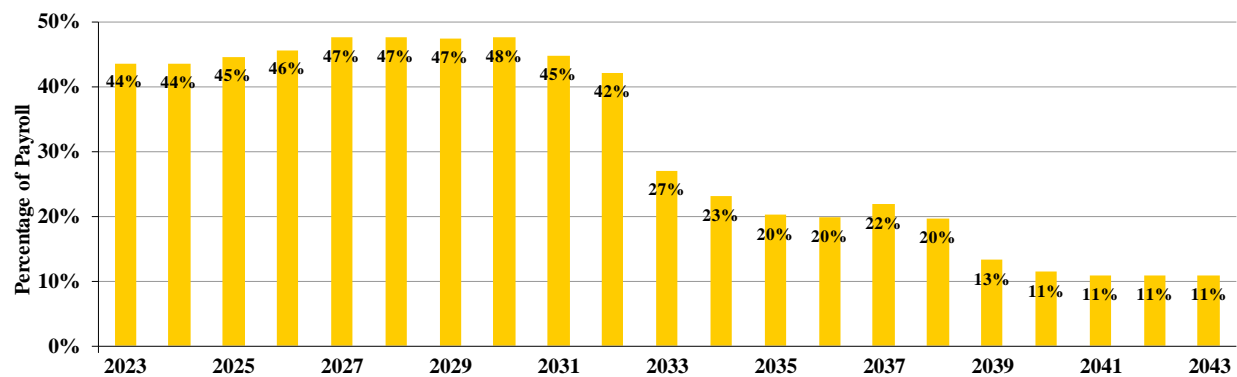

SECTION I – EXECUTIVE SUMMARY

D. Future Expected Financial Trends

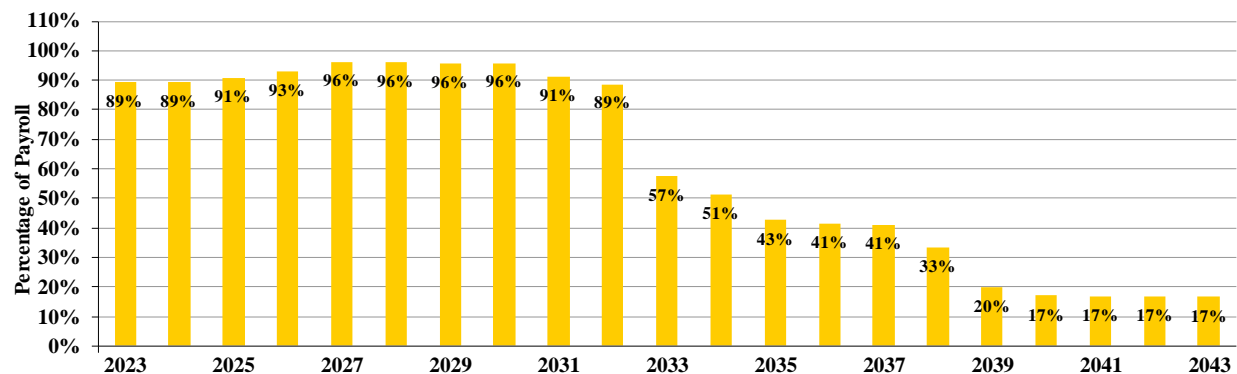

The analysis of projected financial trends is perhaps the most important component of this valuation. In this section, we present our assessment of the implications of the January 1, 2023 valuation results in terms of cost and benefit security (assets over liabilities). All the projections in this section are based on the interest rate assumption of 6.75%. We have assumed a level active workforce population and future payroll growth of 3.00% per year.

The following graphs show the expected employer contribution rates for General and Safety members, and for the Plan in aggregate, based on actually achieving the 6.75% assumption each year for the next 20 years, and if the employers contribute at the actuarially determined rates.

Projection of General Employer Contributions, 6.75% return each year

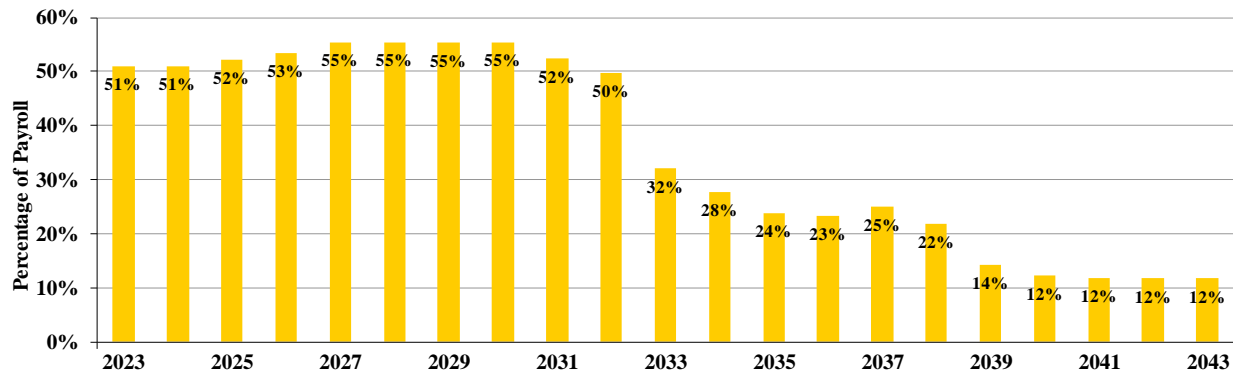

Projection of Safety Employer Contributions, 6.75% return each year

**SAN JOAQUIN COUNTY EMPLOYEES' RETIREMENT ASSOCIATION
ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

SECTION I – EXECUTIVE SUMMARY

Projection of Total Employer Contributions, 6.75% return each year

The projections show that General, Safety, and Total County contribution rates are expected to be about the same next year, as asset losses and gains continue to be recognized in the smoothed Actuarial Value of Assets. The dollar contribution will be approximately \$189 million for General and \$76 million for Safety in 2023, remain at the same percentage of payroll in 2024, then increase as a percentage of payroll until 2027 as the current deferred investment losses continue to be recognized. The drop-in contribution rates in 2033 is due to the 2014 UAL being paid off.

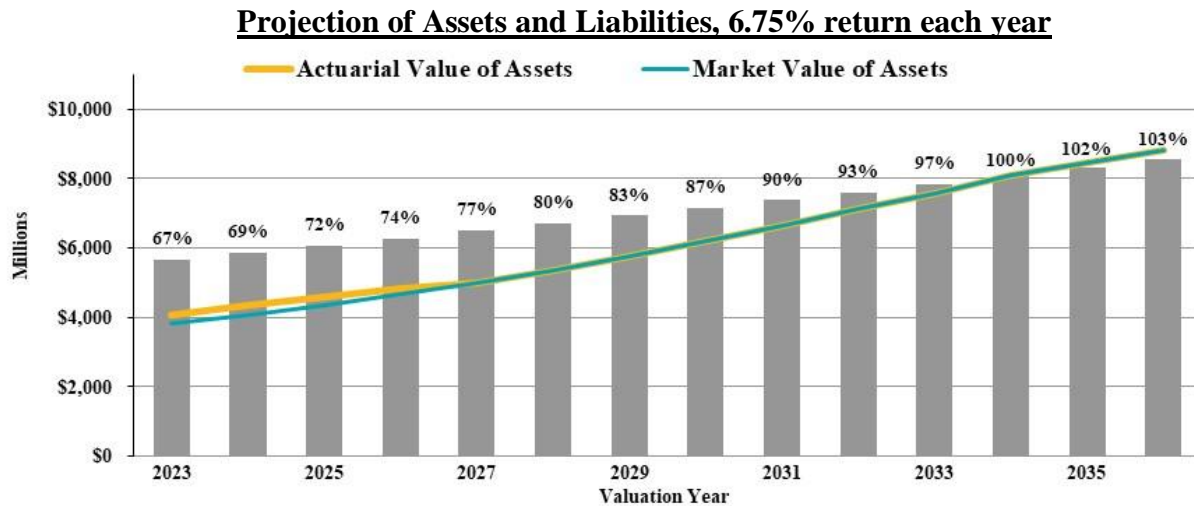

Note that the contribution projections do not forecast any actuarial gains or losses (other than the current net deferred losses reflected in the Actuarial Value of Assets). The graphs also do not include the impact of the additional contributions currently being made by the County, the Mosquito and Vector Control District, and the Superior Court; those additional contributions would eventually be expected to be available to reduce the employer contributions in future years.

**SAN JOAQUIN COUNTY EMPLOYEES' RETIREMENT ASSOCIATION
ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

SECTION I – EXECUTIVE SUMMARY

Asset and Liability Projections:

The graph below shows the projection of SJCERA's assets and liabilities assuming that assets will earn the 6.75% assumption each year during the projection period and the employers contribute at the actuarially determined rates.

The graph shows that the projected funded status on a market-value basis increases over the next 20 years to 103%, assuming the actuarial rate of return assumption is achieved. However, as noted above, it is the actual return on System assets that will determine the future funding status and contribution rates to the Fund.

We note that the funded ratio is expected to gradually climb above 100%; this is because under the PEPRA legislation, the employer contribution is not allowed to fall below the level of the normal cost unless the Plan reaches at least 120% funded (and other conditions are met).

The assets in the graph above also include the additional contributions that the County (2017-2022), the Mosquito and Vector Control District (2018-2022), and Superior Court (2019-2022) have made to the fund. No further additional contributions are assumed. However, the additional contribution reserves are assumed to continue to grow at the 6.75% expected rate of return and are not used in the calculation of the actuarially determined contribution rates, which additionally increases the projected funded status above 100%.

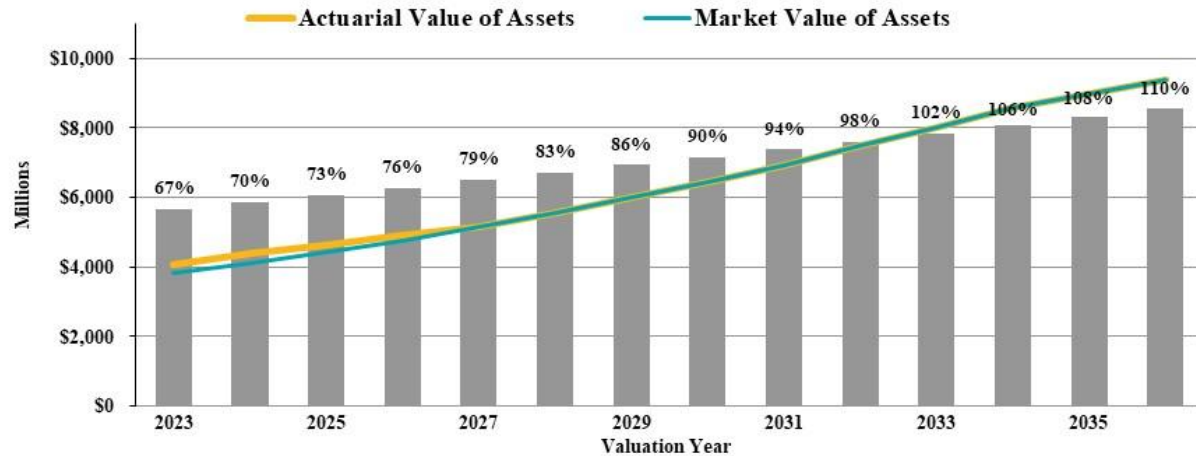

The graph on the next page shows the same information as the previous graph and assumes that additional contributions of 5% of SJCERA payroll are made until the System's funded ratio reaches 100%. Although the Mosquito and Vector Control District and the Superior Courts have been making additional contributions at different rates, and other employers are not currently making additional contributions, we note that the County has been making additional contributions of approximately 5% per year and makes up the vast majority of overall payroll and these additional contributions are for illustrative purposes only. No change in the

**SAN JOAQUIN COUNTY EMPLOYEES' RETIREMENT ASSOCIATION
ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

SECTION I – EXECUTIVE SUMMARY

contribution rate is assumed due to the additional contributions; these assets continue to be excluded from the actuarial cost calculation, as noted earlier.

Projection of Assets and Liabilities, 6.75% return each year, Ongoing County Additional 5% Contributions

As can be seen in the projection above, with the additional expected 5% of pay contributions from the County, the Plan would be expected to return to full funding in 2033, one year earlier than expected in the projections without the additional future contributions.

**SAN JOAQUIN COUNTY EMPLOYEES' RETIREMENT ASSOCIATION
ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

SECTION II – DISCLOSURES RELATED TO RISK

Actuarial valuations are based on a set of assumptions about future economic and demographic experience. These assumptions represent a reasonable estimate of future experience, but actual future experience will undoubtedly be different and may vary significantly. This section of the report is intended to identify the primary risks to the Plan, provide some background information about those risks, and provide an assessment of those risks.

Identification of Risks

A fundamental risk to a pension plan is that the contributions needed to pay the benefits become unaffordable. While we believe it is unlikely that the Plan by itself would become unaffordable, the contributions needed to support the Plan may differ significantly from expectations. While there are a number of factors that could lead to contribution amounts deviating from expectations, we believe the primary risks are:

- Investment risk,
- Assumption change risk, and
- Contribution and payroll risk.

Other risks that we have not identified may also turn out to be important.

Investment Risk is the potential for investment returns to be different than expected. Lower investment returns than anticipated will increase the unfunded actuarial liability necessitating higher contributions in the future unless there are other gains that offset these investment losses. The potential volatility of future investment returns is determined by the Plan's asset allocation and the affordability of the investment risk is determined by the amount of assets invested relative to the size of the plan sponsors or other contribution base.

Assumption change risk is the potential for the environment to change such that future valuation assumptions are different than the current assumptions. For example, declines in interest rates over the last three decades (which have recently reversed) resulted in higher investment returns for fixed income investments, but lower expected future returns necessitating either a change in investment policy, a reduction in discount rate, or some combination of the two. Assumption change risk is an extension of the other risks identified, but rather than capturing the risk as it is experienced, it captures the cost of recognizing a change in environment when the current assumption is no longer reasonable.

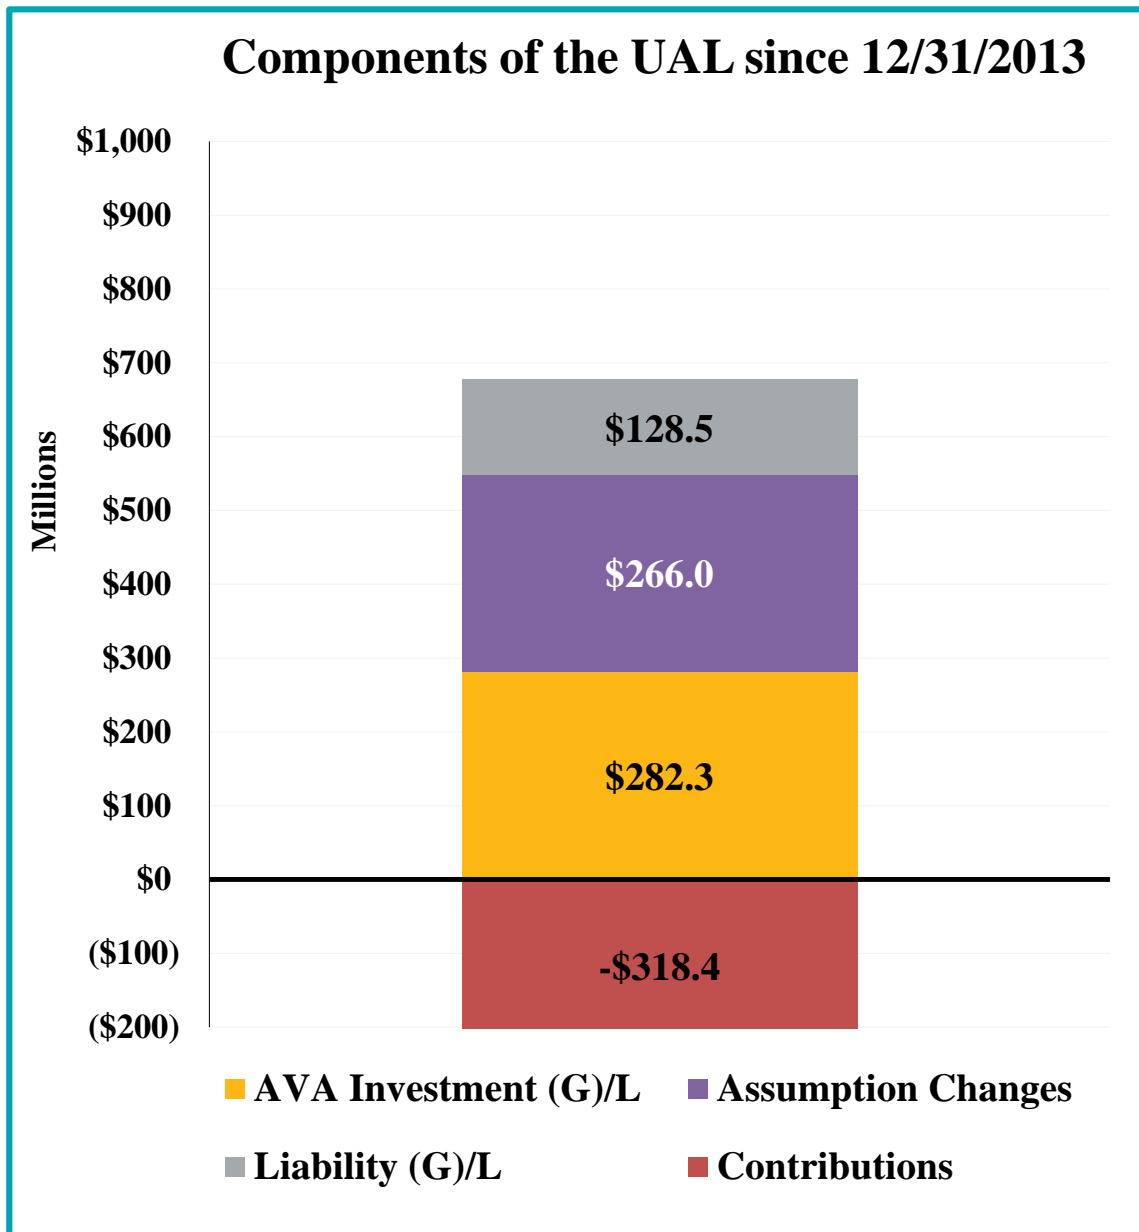

Contribution risk is the potential for actual future contributions to deviate from expected future contributions. There are different sources of contribution risk such as the sponsor choosing to not make contributions in accordance with the funding policy or if the contribution requirement becomes such a financial strain on the sponsor as a result of material changes in the contribution base (e.g., covered employees, covered payroll) that affect the amount of contributions the Plan can collect.

**SAN JOAQUIN COUNTY EMPLOYEES' RETIREMENT ASSOCIATION
ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

SECTION II – DISCLOSURES RELATED TO RISK

The chart below shows the components contributing to the Unfunded Actuarial Liability (UAL) from January 1, 2013 through December 31, 2022. Over the last 10 years, the UAL has increased by approximately \$358.3 million. The investment losses (gold bar) of \$282.3 million on the Actuarial Value of Assets (AVA), assumptions changes (purple bar) resulting in a total UAL increase of \$266.0 million, and net liability losses (gray bar) of \$128.5 million have all contributed to the UAL growth. Contributions in excess of the “tread water” level (red bar) have reduced the UAL by \$318.4 million since December 31, 2013.

Chart II-1

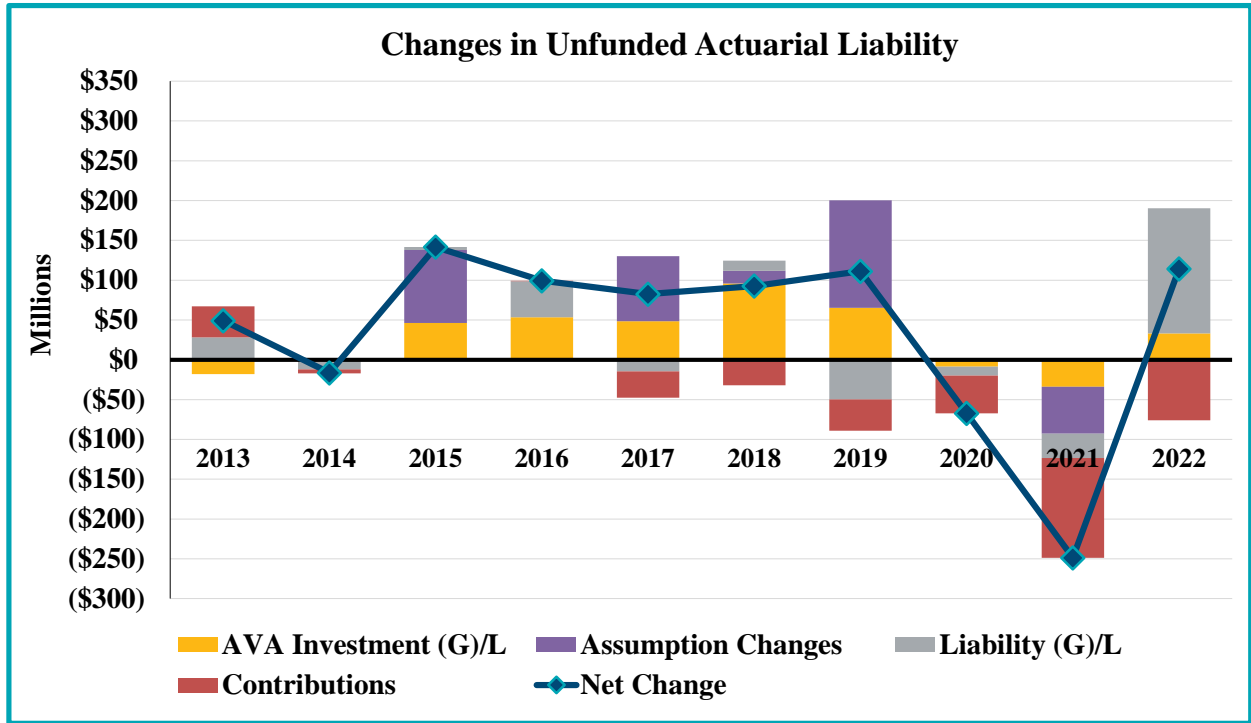

**SAN JOAQUIN COUNTY EMPLOYEES' RETIREMENT ASSOCIATION
ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

SECTION II – DISCLOSURES RELATED TO RISK

Chart II-2 below details the annual sources of the UAL change (colored bars) for the plan years ending December 31. The net UAL change for each year is represented by the blue diamonds.

Chart II-2

On a market value basis, the average annual geometric return over the 10-year period is 5.3%. This has resulted in investment losses on the AVA most years, increasing the UAL, except for the 2013, 2020, and 2021 plan years.

Over the same time period, the assumed rate of return decreased from 7.50% to 6.75%. It is important to note that these changes simply reflect a downward revision to the estimate of future investment earnings and ultimately costs will be determined by actual investment earnings. Future expectations of investment returns will likely change, which may necessitate further changes in the discount rate.

The impact of all assumption changes is represented by the purple bars and also includes decreases in mortality rates projected in the future which had a significant impact on the measurement of the UAL. The assumption changes effective with the January 1, 2019 valuation were only demographic changes with no change to the expected rate of return of 7.25%. The January 1, 2020 valuation decreased the expected rate of return to 7.00%. The January 1, 2022 valuation decreased the discount rate assumption to 6.75% while also adopting new demographic assumptions that lowered the UAL.

The large liability loss in 2022 was caused by higher-than-expected COLAs and negotiated pay increases for many bargaining units.

**SAN JOAQUIN COUNTY EMPLOYEES' RETIREMENT ASSOCIATION
ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

SECTION II – DISCLOSURES RELATED TO RISK

Each year, the UAL is expected to increase for benefits earned in the current year (the normal cost), administrative expenses, and interest on the UAL. This expected increase is referred to as the tread water level. If contributions are greater than the tread water level, the UAL is expected to decrease. Conversely, if contributions are less than the tread water level, the UAL is expected to increase. The amortization policy (as well as the contribution-timing lag) can impact whether or not the contributions exceed the tread water level. For example, the Board changed the amortization policy in 2009 to amortize 50% of the extraordinary asset loss over a 30-year period and the remaining UAL over a 20-year period. Initially, the relatively long amortization period resulted in contributions being below the tread water level.

However, the single equivalent amortization period for the last several years has been much lower (down to 11 and 12 years for General and Safety, respectively, in this valuation), with the UAL payment going towards principal as well as interest on the UAL. In addition, the County and at least two other employers have made discretionary contributions above the actuarially determined contribution rate, in the County's case generally equal to around 5% of their pensionable payroll (with a much larger additional contribution in 2021), including \$22.5 million this year. These contributions went directly toward paying down the principal on the UAL as seen below in Table II-1, which numerically summarizes the changes in the UAL for each year by source over the last 10 years.

Table II-1

Unfunded Actuarial Liability (UAL) Change by Source					
December 31,	Investment Experience	Liability Experience	Assumption Changes	Contributions	Total UAL Change
2013	(\$18,030,000)	\$28,061,000	\$0	\$39,067,000	\$49,098,000
2014	653,000	(11,929,000)	0	(5,073,000)	(16,349,000)
2015	46,200,000	3,691,000	91,855,000	(172,000)	141,574,000
2016	53,461,000	45,033,000	0	831,000	99,325,000
2017	48,426,000	(14,693,000)	81,855,000	(33,016,000)	82,572,000
2018	95,800,000	12,745,000	16,017,000	(31,986,000)	92,576,000
2019	65,252,000	(49,917,000)	135,011,000	(39,203,000)	111,143,000
2020	(8,800,000)	(11,061,000)	0	(47,428,000)	(67,289,000)
2021	(33,977,000)	(30,569,000)	(58,741,000)	(125,436,000)	(248,723,000)
2022	33,276,000	157,135,000	0	(76,032,000)	114,379,000
Total	\$282,261,000	\$128,496,000	\$265,997,000	(\$318,448,000)	\$358,306,000

**SAN JOAQUIN COUNTY EMPLOYEES' RETIREMENT ASSOCIATION
ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

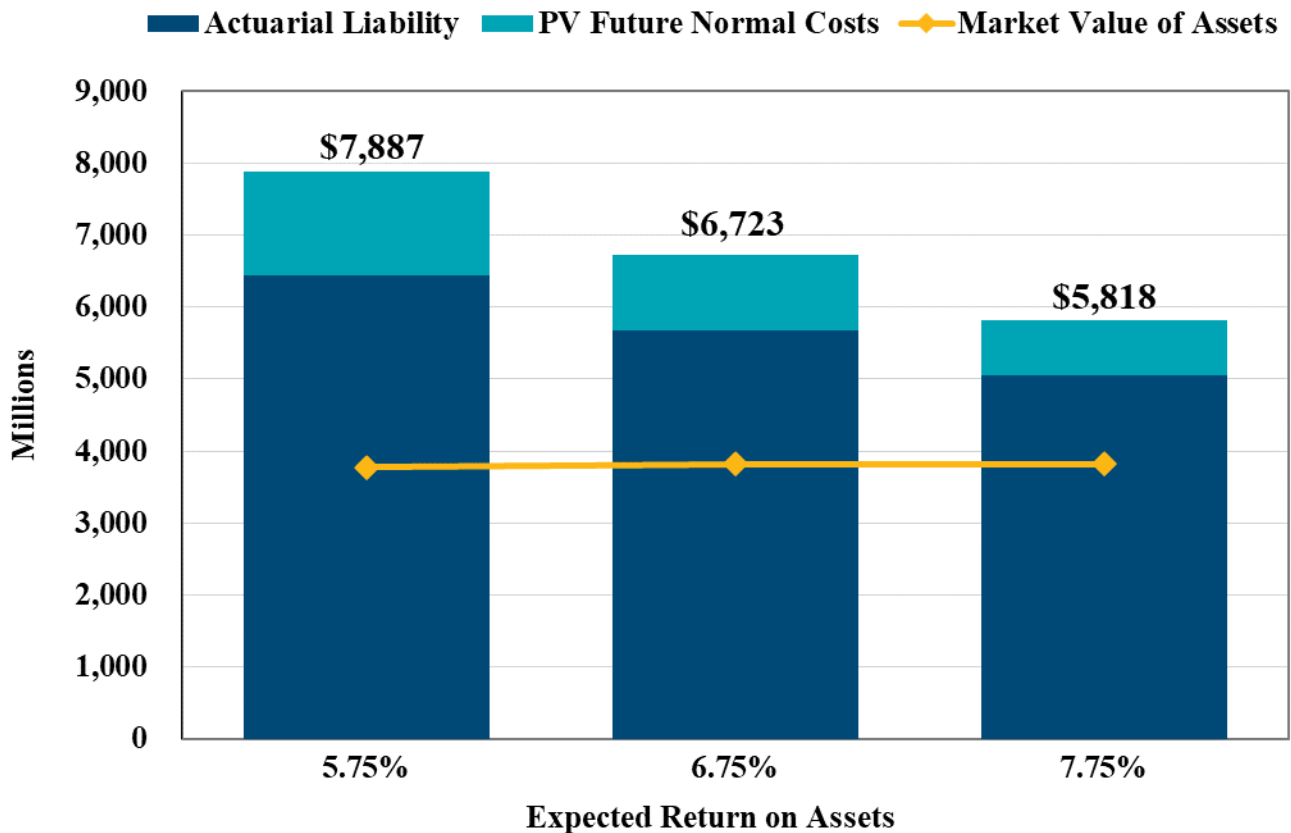

SECTION II – DISCLOSURES RELATED TO RISK

Assessing Costs and Risks

Sensitivity to Investment Returns

The chart below compares assets to the present value of all projected future benefits discounted at the current expected rate of return and at discount rates 100 basis points above and below the expected rate of return. The present value of future benefits is shown as the total bar with the portion attributable to past service in dark blue (Actuarial Liability) and the portion attributable to future service in teal (present value of future normal costs). The Market Value of Assets is shown by the gold line.

Present Value of Future Benefits versus Assets

If investments return 6.75% annually, the Plan will need approximately \$6.7 billion in assets today to pay all projected benefits (including those on behalf of active members for service they are expected to earn in the future) compared to current assets of \$3.8 billion. If investment returns are only 5.75%, the Plan would need approximately \$7.9 billion in assets today, and if investment returns are 7.75%, the Plan would need approximately \$5.8 billion in assets today.

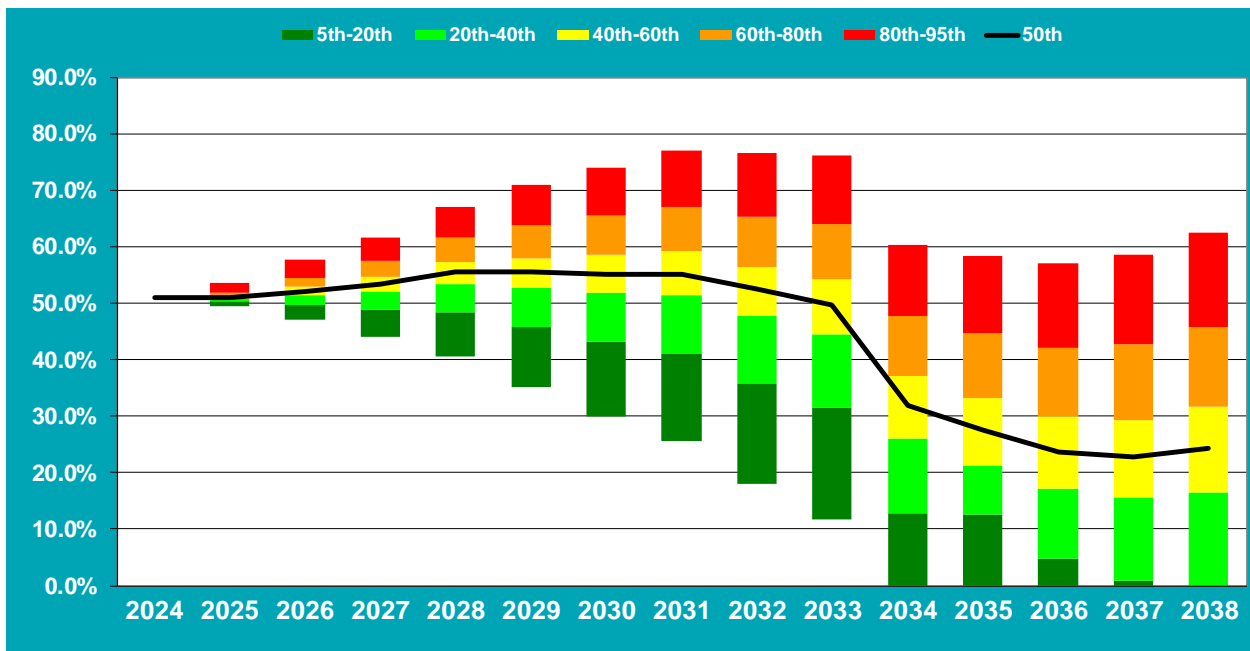

**SAN JOAQUIN COUNTY EMPLOYEES' RETIREMENT ASSOCIATION
ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

SECTION II – DISCLOSURES RELATED TO RISK

Sensitivity to Investment Returns - Stochastic Projections

Stochastic projections serve to show the range of probable outcomes of various measurements. The graphs below and on the following page show the projected range of the employer contribution rate and of the funded ratio on an Actuarial Value of Assets basis. The range in both scenarios is driven by the volatility of investment returns (assumed to be based on a 10.5% standard deviation of annual returns, as indicated in Meketa's capital market assumptions used in the 2022 experience study). The stochastic projections of investment returns are based on an assumption that each future year's investment return is independent from all other years and is identically distributed according to a lognormal distribution. This assumption may result in an unrealistically wide range of compound investment returns over longer periods.

Stochastic Projection of Employer Contributions as a Percentage of Payroll

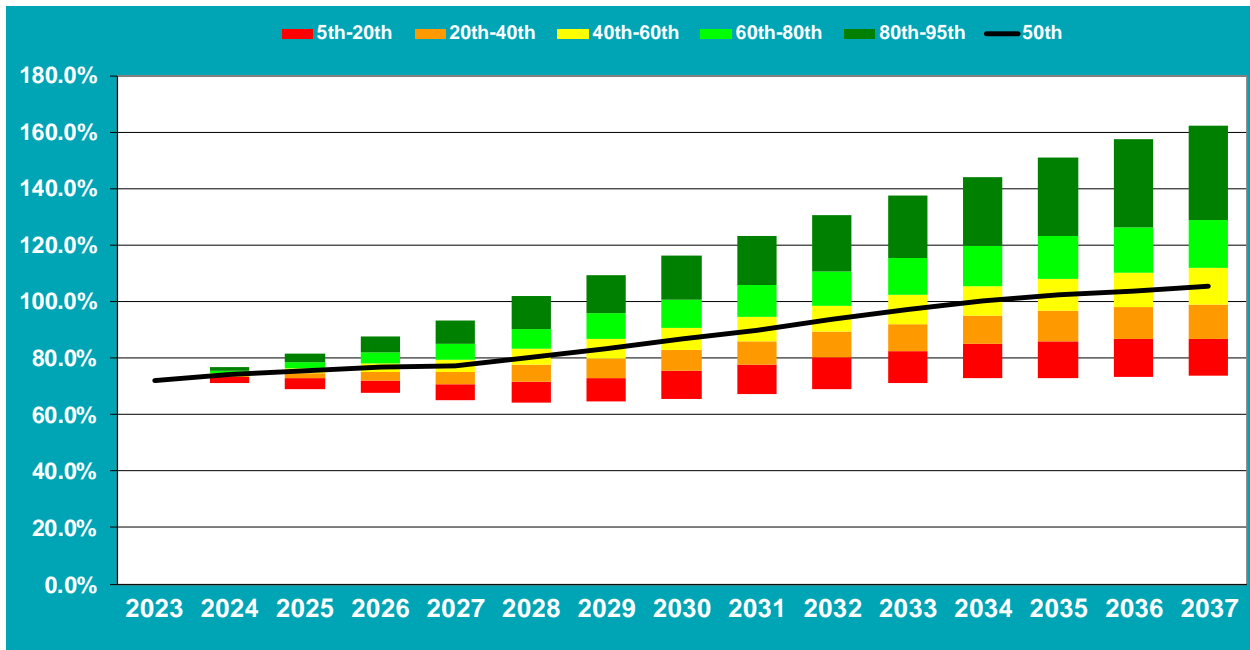

The stochastic projection of employer contributions as a percentage of payroll shows the probable range of future contribution rates. The baseline contribution rate (black line), which is based on the median of the simulations using an average return of 6.75%, aligns closely with the projections discussed in subsection D. of the Executive Summary of this report. In the most pessimistic scenario shown, the 95th percentile, the projected employer contribution rate exceeds 75% of pay in 2031. Conversely, the most optimistic scenario shown, the 5th percentile, the projected employer contribution rate declines to 0% in 2034.

We note that these projections allow the employers' contribution to drop below their share of the normal cost only if the Plan becomes extremely overfunded (i.e., a funded ratio above 100%), as required by the PEPRA legislation. The projections above do not include the additional contribution reserve or any future contributions above the actuarially determined contributions.

**SAN JOAQUIN COUNTY EMPLOYEES' RETIREMENT ASSOCIATION
ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

SECTION II – DISCLOSURES RELATED TO RISK

Stochastic Projection of Funded Ratio on an Actuarial Value of Assets Basis

The graph above shows the projection of the funded ratio based on the Actuarial Value of Assets. The projections do not assume future additional contributions from the County or other employers. While the baseline-funded ratio (black line) is projected to be approximately 105% at the end of the 15-year period shown here, there is a wide range of potential outcomes. Good investment returns have the likelihood of bringing the funded ratio well over 100%. Due to the current funding policy of the Plan, even in scenarios with unfavorable investment returns, the Plan is projected to remain over 60% funded on an Actuarial Value of Assets basis in all but the most unfavorable of scenarios, as long as the actuarially determined contributions continue to be made.

Contribution Risk

The Safety contribution rate is very large at over 89% of payroll and as a result, future salary increases, and the hiring of new members are potentially at risk. When member payroll growth stagnates or even declines, the dollar level of contributions made to the Plan also stagnate or decline since contributions are based on payroll levels.

There is also a risk of the contribution rate increasing even higher when payroll decreases since the Plan's funding policy amortizes the UAL as a level percentage of payroll. This means that the UAL payments increase at the assumed payroll growth rate of 3.00%, so that the payment is expected to remain constant as a percentage of payroll. If payroll growth is less than the expected 3.00% or there is a decline in payroll, the UAL payments are spread over a smaller payroll base and the contribution rate as a percentage of payroll increases, making the Plan less affordable for the Safety and potentially other plan sponsors.

**SAN JOAQUIN COUNTY EMPLOYEES' RETIREMENT ASSOCIATION
ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

SECTION II – DISCLOSURES RELATED TO RISK

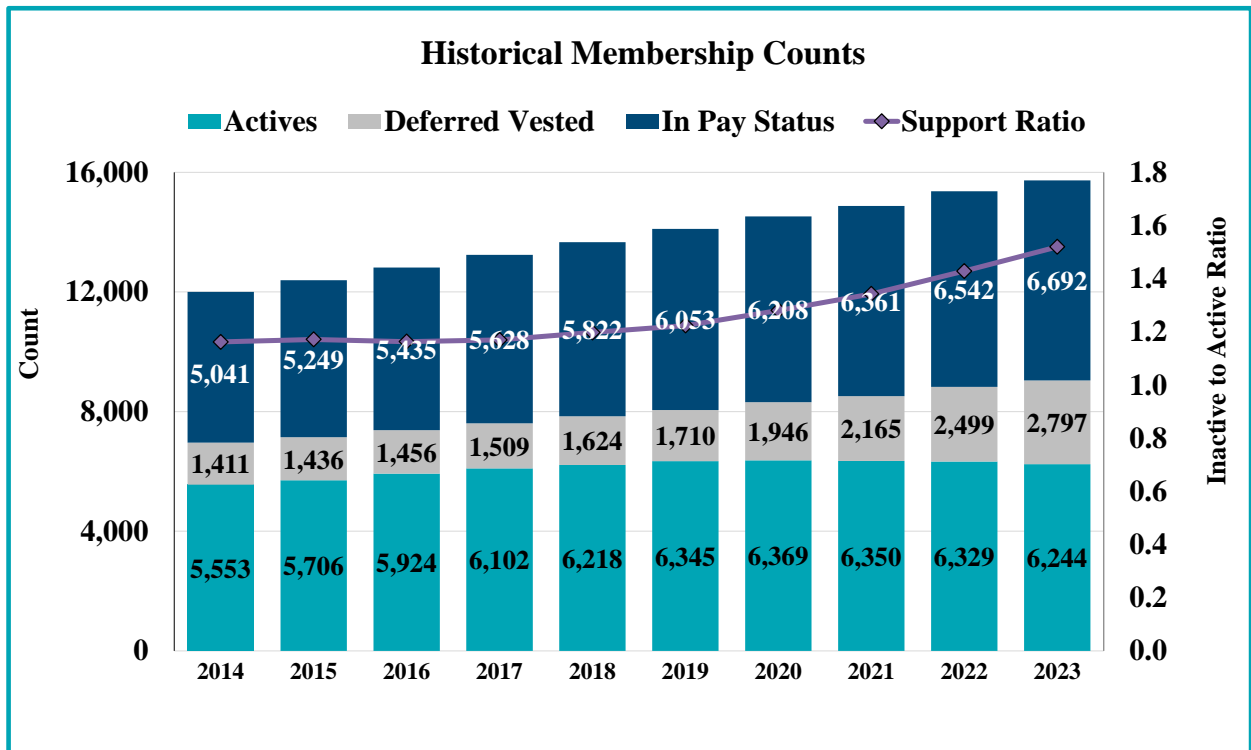

Plan Maturity Measures

The future financial condition of a mature pension plan is more sensitive to each of the risks identified above than a less mature plan. Before assessing each of these risks, it is important to understand the maturity of the Plan and how the maturity has changed over time.

Plan maturity can be measured in a variety of ways, but they all get at one basic dynamic – the larger the plan is compared to the contribution or revenue base that supports it; the more sensitive the plan will be to risk. The measures below have been selected as the most important in understanding the primary risks identified for the Plan.

Inactives per Active (Support Ratio)

One simple measure of plan maturity is the ratio of the number of inactive members (those receiving benefits or inactives – those entitled to a deferred benefit) to the number of active members. The Support Ratio is expected to increase gradually as a plan matures. The Support Ratio slightly declined from 2014 to 2017 since the active population increased an average of about 3.6% per year. The last six years, the active population increased at a slower pace than the inactive population – and actually declined in each of the last three years - resulting in an increase in the Support Ratio.

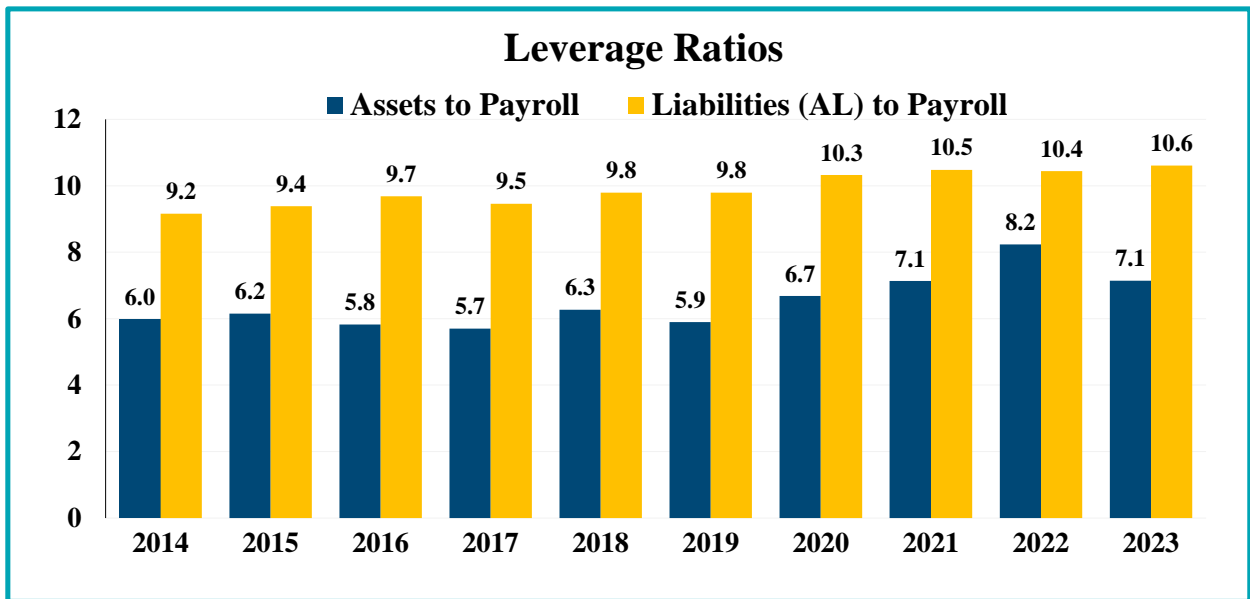

**SAN JOAQUIN COUNTY EMPLOYEES' RETIREMENT ASSOCIATION
ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

SECTION II – DISCLOSURES RELATED TO RISK

Leverage Ratios

Leverage or volatility ratios measure the size of the plan compared to its revenue base more directly. The asset leverage ratio is simply the market value of assets to active member payroll and indicates the sensitivity of the Plan to investment returns. The liability leverage ratio is the plan's actuarial liability to active member payroll and indicates the sensitivity of the Plan to assumption changes or demographic experience.

The chart below shows the historical leverage ratios of the Plan. Both leverage ratios have increased since 2014, but the asset to payroll ratio had remained relatively stable around 6.0 - assets are six times member payroll – from 2013 to 2019. From 2020 to 2022, the ratio increased from 6.7 to 8.2 times member payroll, due to the favorable asset returns and additional contributions. The ratio decreased from 2022 to 2023 due to lower asset returns and higher payroll. The liability to payroll ratio has increased in most years, driven by the continued maturation of the Plan and assumption changes.

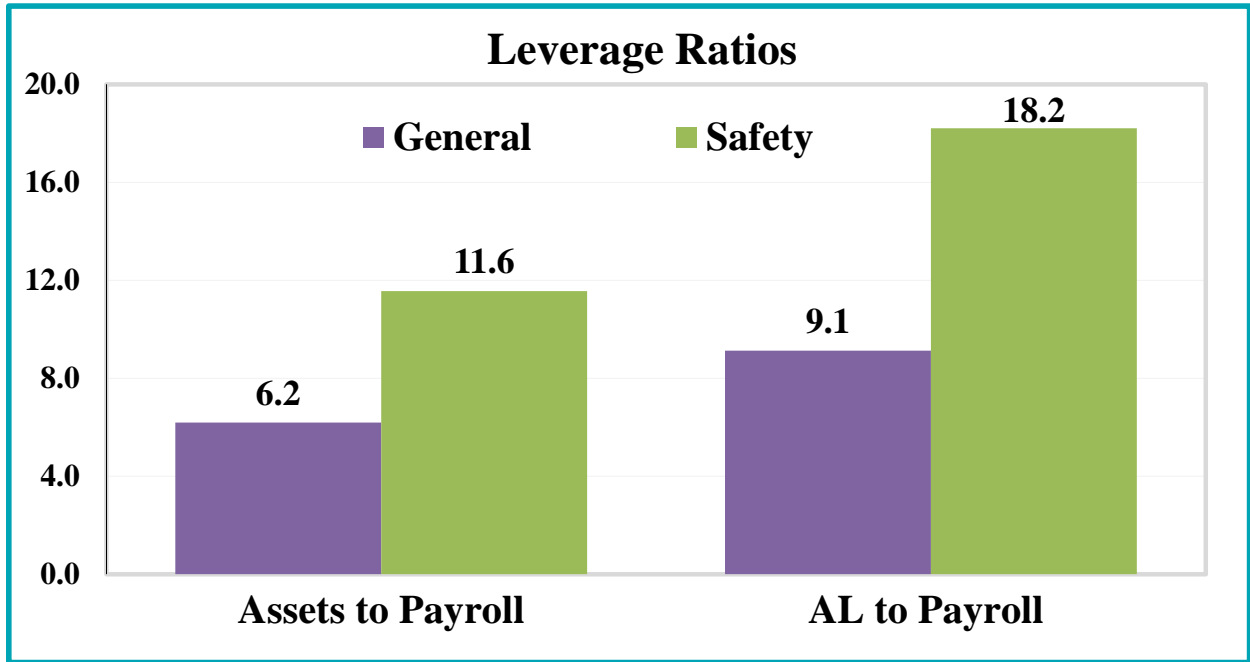

To appreciate the impact of the ratio of assets to payroll on plan cost, consider the situation for a new plan with almost no assets. Even if the assets suffer a bad year of investment returns, the impact on the plan cost is nil, because the asset level is so small.

As the Plan becomes better funded, the asset leverage ratio will increase, and if it were 100% funded, the asset leverage ratio would be over 10 times payroll, or the liability leverage ratio.

We note that the ratio of both assets and liabilities to payroll, and therefore the sensitivity to investment returns and assumption changes, is higher for the Safety members compared to the General members, because of the higher benefit amounts and the earlier average retirement ages for Safety.

**SAN JOAQUIN COUNTY EMPLOYEES' RETIREMENT ASSOCIATION
ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

SECTION II – DISCLOSURES RELATED TO RISK

The General asset leverage ratio of 6.2 means that if the Plan's assets lose 10% of their value, which is a 16.75% actuarial loss compared to the expected return of 6.75%, the loss would be equivalent to 104% of payroll (16.75% times 6.2). Based on the current amortization policy and economic assumptions, the General contribution rate would ultimately increase by just over 9% of payroll, after deferred asset losses are fully recognized. The same investment loss for the Safety group with an asset ratio of 11.6 would be equivalent to 194% of payroll, or an approximate contribution rate increase of almost 17%. Therefore, the contribution rates for the Safety members will generally be much more volatile than those of the General members.

More Detailed Assessment

While a more detailed assessment is always valuable to enhance the understanding of the risks identified above, we believe the scenarios illustrated above cover the primary risks facing the Plan at this time. We would be happy to provide the Board with a more in-depth analysis at their request.

**SAN JOAQUIN COUNTY EMPLOYEES' RETIREMENT ASSOCIATION
ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

SECTION III – ASSETS

Pension Plan assets play a key role in the financial operation of the System and in the decisions the Board may make with respect to future deployment of those assets. The level of assets, the allocation of assets among asset classes, and the methodology used to measure assets will likely impact benefit levels, employer contributions, and the ultimate security of participants' benefits.

In this section, we present detailed information on System assets including:

- **Disclosure** of System assets as of December 31, 2021 and December 31, 2022,
- Statement of the **changes** in market values during the year,
- Development of the **Actuarial Value of Assets**,
- An assessment of **investment performance**, and
- Determination of **reserve balances** as of January 1, 2023.

Disclosure

There are two types of asset values disclosed in the valuation, the Market Value of Assets, and the Actuarial Value of Assets. The market value represents the fair value of assets that provide the principal basis for measuring financial performance from one year to the next. Market values, however, can fluctuate widely with corresponding swings in the marketplace. As a result, market values are usually not as suitable for long-range planning as are the Actuarial Value of Assets, which reflect smoothing of annual investment returns.

Table III-1 on the next page discloses and compares the market values as of December 31, 2021 and December 31, 2022.

ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

SECTION III – ASSETS

Actuarial Value of Assets (AVA)

The Actuarial Value of Assets represents a “smoothed” value developed by the actuary to reduce contribution volatility, which could develop due to short-term fluctuations in the Market Value of Assets. For this System, the Actuarial Value of Assets is calculated by recognizing the deviation of actual investment returns compared to the expected return over a five-year period.

The dollar amount of the expected return on the Market Value of Assets is determined using the actual contributions, administrative expense, and benefit payments during the year. Any difference between this amount and the actual investment earnings is considered a gain or loss. However, in no event will the Actuarial Value of Assets be less than 80% or more than 120% of market value on the valuation date. The following table shows the development of the actuarial asset value.

TABLE III-3 Development of Actuarial Value of Assets as of January 1, 2023									
	(a)	(b)	(c)	(d)	(e)	(f)	(g) = (f) – (e)	(h)	(i) = (g) x (h)
Year	Contributions	Benefits	Administrative Expense	Healthcare Fund Transfer	Expected Return	Actual Return	Additional Earnings	Not Recognized	Unrecognized Earnings
2019	263,627,444	236,350,072	4,931,163	299,014	206,793,106	380,674,528	173,881,422	20%	34,776,284
2020	281,269,983	251,551,677	4,536,455	172,041	227,983,829	276,996,530	49,012,701	40%	19,605,080

ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

SECTION III – ASSETS

Investment Performance

The following table calculates the investment related gain/loss for the plan year on both a market value and an actuarial value basis. The market value gain/loss is a useful measure for comparing the actual asset performance to the previous valuation assumption.

The employer contributions include the additional contributions of \$23,117,567 made by the County, the MVCD, and the Superior Court in the gain/loss development for the Market Value of Assets but are excluded in the analysis for the valuation assets.

TABLE III-4 Asset Gain/(Loss)		
	Market Value	Valuation Assets
January 1, 2022 value	\$ 4,198,788,004	\$ 3,668,064,009
Employer Contributions	269,080,047	245,962,480
Employee Contributions	47,405,308	47,405,308
Healthcare Transfer	224,628	224,628
Benefit Payments	(279,363,795)	(279,363,795)
Administrative Expenses	(5,621,704)	(5,621,704)
Expected Investment Earnings (6.75%)	284,479,114	247,887,766
Expected Value December 31, 2022	\$ 4,514,991,602	\$ 3,924,558,692
Investment Gain / (Loss)	(697,238,840)	(33,276,439)
January 1, 2023 value	\$ 3,817,752,762	\$ 3,891,282,253
Return	-9.79%	5.84%

Note that the return on market value shown above is not the dollar-weighted return on assets required for the purposes of GASB Statements 67 and 68.

ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

SECTION III – ASSETS

Reserve Balances

The following table shows historical balances of the Post-1982 Settlement Reserve.

TABLE III-6 Post-1982 Settlement Reserve				
Valuation Date January 1	Number Eligible	Benefits Payable	Reserve	Estimated Years of Payments
2008	1,896	3,683,939	25,872,222	13
2009	1,856	3,602,904	22,015,055	10
2010	1,800	3,484,762	20,090,654	9
2011	1,738	3,370,636	18,108,660	6
2012	1,679	3,243,068	14,556,866	5
2013	1,709	3,244,009	11,063,855	4
2014	1,662	3,197,416	8,765,004	3
2015	1,617	3,046,233	6,338,007	2
2016	1,560	2,939,133	3,644,507	1
2017	1,501	2,821,575	915,393	<1
2018	1,441	2,705,007	485,100	<1
2019	1,376	2,594,058	62,951	<1
2020	1,313	2,479,710	65,877	<1
2021	1,255	2,372,539	70,425	<1
2022	1,196	2,260,212	75,271	<1
2023	1,134	2,145,376	80,451	<1

As of January 1, 2023, the total projected liability associated with paying the Post-82 Settlement allowances for the remaining lifetime of the eligible members and beneficiaries is approximately \$14.7 million. Payments from the Post-82 Settlement reserve have been suspended, with the last benefits payable in August of 2018.

SAN JOAQUIN COUNTY EMPLOYEES' RETIREMENT ASSOCIATION
ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023

SECTION IV – LIABILITIES

In this section, we present detailed information on System liabilities including:

- **Disclosure** of System liabilities on January 1, 2022 and January 1, 2023
- Statement of **changes** in these liabilities during the year

Disclosure

Several types of liabilities are calculated and presented in this report. We note that the liabilities described below are not appropriate for assessing the sufficiency of plan assets to cover the estimated cost of settling the plan's benefit obligations, in the case of a plan termination or other similar action.

- **Present Value of Future Benefits:** Used for measuring all future System obligations, represents the amount of money needed today to fully fund all benefits of the System both earned as of the valuation date and those to be earned in the future by current plan participants, under the current System provisions.
- **Actuarial Liability:** Used for funding calculations, this liability is calculated taking the present value of future benefits and subtracting the present value of future member contributions and future employer normal costs under an acceptable actuarial funding method. The method used for this System is called the **Entry Age Normal (EAN)** funding method.
- **Unfunded Actuarial Liability:** The excess of the Actuarial Liability over the Actuarial Value of Assets.

Table IV-1 discloses each of these liabilities for the current and prior valuations and shows the allocation of the valuation assets between SJCERA's valuation subgroups, General and Safety. With respect to each disclosure, a subtraction of the appropriate value of Plan assets yields, for each respective type, a **net surplus**, or an **Unfunded Actuarial Liability**.

ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

SECTION IV – LIABILITIES

Changes in Liabilities

Each of the liabilities disclosed in the prior table are expected to change at each valuation. The components of that change, depending upon which liability is analyzed, can include:

- New hires since the last valuation
- Benefits accrued since the last valuation
- Plan amendments
- Passage of time which adds interest to the prior liability
- Benefits paid to retirees since the last valuation
- Participants retiring, terminating, or dying at rates different than expected
- A change in actuarial or investment assumptions
- A change in the actuarial funding method

Unfunded liabilities will change because of all of the above, and due to changes in System assets resulting from:

- Employer contributions different than expected
- Investment earnings different than expected
- A change in the method used to measure plan assets

**TABLE IV-2
Changes in Actuarial Liability**

Actuarial Liability at January 1, 2022	\$	5,323,788,814
Actuarial Liability at January 1, 2023	\$	5,674,662,702
Liability Increase (Decrease)		350,873,888
Change due to:		
Accrual of Benefits	\$	111,427,408
Actual Benefit Payments		(279,363,795)
Interest		357,602,520
Assumption Changes		0
Actuarial Liability (Gain) / Loss		161,207,755

10. Contribution (Gain) / Loss	\$ 1,942,358	\$ (2,627,403)	\$ (685,045)

¹ Assets exclude the additional County, MVCD, and Superior Court Contribution Reserves.

**SAN JOAQUIN COUNTY EMPLOYEES' RETIREMENT ASSOCIATION
ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

SECTION V – CONTRIBUTIONS

In the process of evaluating the financial condition of any pension plan, the actuary analyzes the assets and liabilities to determine what level (if any) of contributions is needed to properly maintain the funding status of the System. The actuarial process utilizes funding techniques with a goal of producing a pattern of contributions that are both stable and predictable.

For this System, the actuarial funding method used to determine the normal cost and the Unfunded Actuarial Liability is the **Entry Age Normal (EAN)** cost method. There are three primary components to the total contribution: the **normal cost rate** (employee and employer), the **Unfunded Actuarial Liability rate** (UAL rate), and the **administrative expense** contribution.

The normal cost rate is determined in the following steps. First, an individual normal cost rate is determined by taking the value, as of entry age into the System, of each member's projected future benefits. This value is then divided by the value, also at entry age, of the member's expected future salary producing a normal cost rate that should remain relatively constant over a member's career. The total normal cost is adjusted with interest to the middle of the year, to reflect the fact that the normal cost contributions are paid throughout the year as member payroll payments are made. Finally, the total normal cost rate is reduced by the member contribution rate to produce the employer normal cost rate.

The member contribution rates used in this valuation reflect the broad cost sharing arrangements in place as of the valuation date that apply to the 2024 Plan Year (i.e., whether the bargaining unit is making the full COLA cost-sharing member contribution and/or the additional 14%/33% Basic member rate). However, the valuation does not include additional fixed rate contributions payable by some bargaining units (of 3%, 4% or 5% of payroll). Those additional contributions are applied outside of the valuation, and reductions to the employer rates to reflect those additional contributions are provided directly to the individual bargaining groups.

The Unfunded Actuarial Liability is the difference between the EAN Actuarial Liability and the Actuarial Value of Assets. At the July 24, 2015 board meeting, the SJCERA Board of Retirement chose to make a change to their funding policy, opting to amortize any unexpected changes in the UAL over a period of 15 years as a level percentage of payroll, with new amortization layers each year. The result was a set of three amortization bases as of January 1, 2015: the 2008 loss being amortized over 25 years, the remaining UAL as of December 31, 2014 being amortized over 19 years, and new additions to the UAL on and after January 1, 2015 amortized over 15 years. The single equivalent amortization period for all streams of UAL payments is 11 years for General and 12 years for Safety as of January 1, 2023. The amortization period for each Unfunded Actuarial Liability layer will decrease each year.

The total administrative expenses are assumed to be \$5,315,922 in 2023, increasing with the CPI assumption each valuation. The administrative expenses are split between employees and employers based on their share of the overall contributions.

ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

SECTION VI – ADDITIONAL ANNUAL FINANCIAL REPORT SCHEDULES

This section of the report provides a schedule for the Actuarial Section of the annual financial report for SJCERA that is not provided in the GASB 67 and 68 reports.

We have prepared the following schedule:

Schedule of Funded Liabilities by Type

The schedule of funded liabilities by type (formerly known as the solvency test) shows the portion of Actuarial Liabilities for active member contributions, inactive members, and the employer financed portion of the active members that are covered by the Actuarial Value of Assets.

The Actuarial Liability is determined assuming that the System is ongoing, and participants continue to terminate employment, retire, etc., in accordance with the actuarial assumptions. Liabilities for 2013 through 2015 were discounted at an assumed interest rate of 7.50%, whereas liabilities for 2016 and 2017 were discounted at the assumed rate of 7.40%, and the liabilities for 2018 and 2019 were discounted at the assumed rate of 7.25%. The liabilities for 2020 and 2021 were discounted at the assumed rate of 7.00%. The liabilities for 2022 and 2023 are discounted at the assumed rate of 6.75%.

Table VI-1 Schedule of Funded Liabilities by Type Aggregate Actuarial Liabilities for							
Valuation Date January 1,	Active Member Contributions	Retirees & Beneficiaries	Active Members ¹	Actuarial Value of Assets	Portion of Actuarial Liabilities Covered by Reported Assets		
	(1)	(2)	(3)		(1)	(2)	(3)

¹ Lower rates assumed for members with less than 10 years of service, and higher rates assumed for members with at least 30 years of service.

The probabilities for each cause of separation represent the likelihood that a given member will separate at a particular age for the indicated reason. As an example, if the probability of separation of a male general member at age 20 is 0.036, that indicates that 3.6% of active general members are expected to separate from service during the year. Rates of Duty and Non-Duty Death are for active members who reach the given age during 2022.

**SAN JOAQUIN COUNTY EMPLOYEES' RETIREMENT ASSOCIATION
ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

¹ 75% of vested terminated General Members with less than five years of service, 25% of those with five to 14 years of service, and 40% of those with more than 15 years of service, are assumed to be reciprocal.

² 67% of vested terminated Safety Members with less than five years of service, and 50% of those with more than five years of service, are assumed to be reciprocal.

**SAN JOAQUIN COUNTY EMPLOYEES' RETIREMENT ASSOCIATION
ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

**APPENDIX B – STATEMENT OF CURRENT
ACTUARIAL ASSUMPTIONS AND METHODS**

The assumptions and methods used in the actuarial valuation as of January 1, 2023 are:

Actuarial Methods

1. Actuarial Cost Method

The actuarial valuation is prepared using the entry age actuarial cost method (CERL 31453.5). Under the principles of this method, the actuarial present value of the projected benefits of each individual included in the valuation is allocated as a level percentage of the individual's projected compensation between entry age and assumed exit (until maximum retirement age). For members who transferred from outside of SJCERA, entry age (for the actuarial cost calculation only) is based on entry into the system. The normal cost for the Plan is based on the sum of the individual normal costs for each member (Individual Entry Age Method).

The UAL (or Surplus Funding) is amortized as a percentage of the projected salaries of present and future members of SJCERA. Effective with the January 1, 2015 valuation, the UAL as of January 1, 2014 is amortized over a closed 19-year period (10 years remaining as of January 1, 2023), except for the additional UAL attributable to the extraordinary loss from 2008, which is being amortized over a separate closed period (16 years as of January 1, 2023).

Any subsequent unexpected change in the Unfunded Actuarial Liability after January 1, 2014 is amortized over 15 years. The UAL payment for the 2020 assumption change was phased in over a three-year period.

2. Valuation of Assets

The assets are valued using a five-year smoothed method based on the difference between the expected market value and the actual market value of the assets as of the valuation date. The expected market value is the prior year's market value increased with the net increase in the cash flow of funds, all increased with interest during the past fiscal year at the expected investment return rate assumption.

An asset corridor limit is applied such that the smoothed Market Value of Assets stays within 20% of the Market Value of Assets.

The additional employer contribution reserve and special non-valuation reserves are not included in the valuation assets for the January 1, 2023 valuation. It is at each of the employers', who are making additional contributions, discretion as to when these reserves will be included in the valuation assets that determine contributions.

**SAN JOAQUIN COUNTY EMPLOYEES' RETIREMENT ASSOCIATION
ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

**APPENDIX B – STATEMENT OF CURRENT
ACTUARIAL ASSUMPTIONS AND METHODS**

Actuarial Assumptions

The recommended assumptions were reviewed with the Board at their July 7, 2022 meeting. The demographic assumptions are based on an experience study covering the period from January 1, 2019 through December 31, 2021.

1. Rate of Return

Assets are assumed to earn 6.75% net of investment expenses.

2. Administrative Expenses

Administrative expenses are assumed to be \$5,315,922 for the next year, to be split between employees and employers based on their share of the overall contributions. Expenses are expected to grow with the cost-of-living (by 2.75% per year.)

3. Cost of Living

The cost of living as measured by the Consumer Price Index (CPI) will increase at the rate of 2.75% per year. This assumption is also used to project increases in the PEPRA wage cap.

4. Post Retirement COLA

For those with the 3% COLA benefit (i.e., 100% of CPI up to 3% annually with banking), 2.60% annual increases are assumed. Increases are assumed to occur on April 1.

Higher COLA annual increases of 2.75% are assumed for members in pay status. This is not considered an assumption change, but rather is used as a proxy to estimate the value of the increases in COLA banks which have occurred since the adoption of the 2.60% assumption based on recent experience.

**SAN JOAQUIN COUNTY EMPLOYEES' RETIREMENT ASSOCIATION
ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

**APPENDIX B – STATEMENT OF CURRENT
ACTUARIAL ASSUMPTIONS AND METHODS**

5. Increases in Pay

Assumed pay increases for active Members consist of increases due to base salary adjustments plus service-based increase due to longevity and promotion, as shown below:

	Pay Increases										
	Years of Service										
	0	1	2	3	4	5	6	7	8-9	10-14	15+
Base Increase	3.00%	3.00%	3.00%	3.00%	3.00%	3.00%	3.00%	3.00%	3.00%	3.00%	3.00%
Longevity & Promotion											
General	8.00%	7.00%	4.00%	4.00%	2.00%	2.00%	2.00%	2.00%	1.25%	1.00%	0.50%
Safety	10.00%	10.00%	5.00%	5.00%	5.00%	2.25%	1.25%	1.25%	1.25%	1.25%	1.25%
Total (Compound)											
General	11.24%	10.21%	7.12%	7.12%	5.06%	5.06%	5.06%	5.06%	4.29%	4.03%	3.52%
Safety	13.30%	13.30%	8.15%	8.15%	8.15%	5.32%	4.29%	4.29%	4.29%	4.29%	4.29%

6. Family Composition

Percentage married for all active members who retire, become disabled, or die during active service is shown in the following table. Male members are assumed to be three years older than their spouses, and female members are assumed to be two years younger than their spouses. It is assumed that 90% of participants with eligible beneficiaries who do not have a service-related disability elect the 60% Joint and Survivor allowance.

Percentage Married	
Gender	Percentage
Males	75%
Females	55%

7. Rates of Termination

Sample rates of termination are shown in the following table on the next page. Termination rates do not apply once a member is eligible for retirement.

**SAN JOAQUIN COUNTY EMPLOYEES' RETIREMENT ASSOCIATION
ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

**APPENDIX B – STATEMENT OF CURRENT
ACTUARIAL ASSUMPTIONS AND METHODS**

Rates of Termination*		
Years of Service	General	Safety
0	20.00%	12.00%
1	13.00%	7.00%
2	10.00%	5.00%
3	7.75%	5.00%
4	7.75%	5.00%
5	7.75%	5.00%
6	7.75%	3.00%
7	4.50%	2.00%
8	4.50%	2.00%
9	3.75%	2.00%
10	3.75%	2.00%
11-12	2.75%	2.00%
13	2.50%	2.00%
14-19	2.50%	1.25%
20-29	1.00%	0.00%
30+	0.00%	0.00%

*Termination rates do not apply once a member is eligible for retirement.

8. Withdrawal

Rates of withdrawal apply to active Members who terminate their employment and withdraw their member contributions, forfeiting entitlement to future Plan benefits.

50% of all General Member terminations with less than five years of service, 25% of those with five to 14 years of service, and 10% of those with 15 or more years of service, are assumed to take a refund of contributions.

50% of all Safety Member terminations with less than five years of service, 20% of those with five to 14 years of service, and 15% of those with 15 or more years of service, are assumed to take a refund of contributions.

9. Vested Termination and Reciprocal Transfers

Rates of vested termination apply to active Members who terminate their employment and leave their member contributions on deposit with the Plan.

**SAN JOAQUIN COUNTY EMPLOYEES' RETIREMENT ASSOCIATION
ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

**APPENDIX B – STATEMENT OF CURRENT
ACTUARIAL ASSUMPTIONS AND METHODS**

50% of all General Member terminations with less than five years of service, 75% of those with five to 14 years of service, and 90% of those with 15 or more years of service, are assumed to leave their contributions on deposit.

50% of all Safety Member terminations with less than five years of service, 80% of those with five to 14 years of service, and 85% of those with 15 or more years of service, are assumed to leave their contributions on deposit.

Vested terminated General Members are assumed to begin receiving benefits at age 58; vested terminated Safety Members are assumed to begin receiving benefits at age 50, unless they have outgoing reciprocity, in which case they are assumed to begin receiving benefits at age 53.

75% of vested terminated General Members with less than five years of service, 25% of those with five to 14 years of service, and 40% of those with 15 or more years of service, are assumed to be reciprocal.

67% of vested terminated Safety Members with less than five years of service, and 50% of those with five or more years of service, are assumed to be reciprocal.

Final average pay for General Members who terminate with reciprocity is assumed to increase by 3.52% per year until their assumed retirement date. Final average pay for Safety Members who terminate with reciprocity is assumed to increase by 4.29% per year until their assumed retirement date.

52	0.090%	0.217%	0.075%	0.075%
57	0.102%	0.136%	0.075%	0.075%
62	0.118%	0.150%	0.075%	0.075%

**SAN JOAQUIN COUNTY EMPLOYEES' RETIREMENT ASSOCIATION
ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

**APPENDIX B – STATEMENT OF CURRENT
ACTUARIAL ASSUMPTIONS AND METHODS**

12. Rates of Mortality for Healthy Lives

Mortality rates for General active members are based on the sex distinct 2021 CalPERS Pre-Retirement Non-Industrial Mortality Table, with generational mortality improvements projected from 2017 using 80% of Projection Scale MP-2020.

Mortality rates for Safety active members are based on the sum of the rates from the 2021 CalPERS Industrial and Non-Industrial Mortality tables, with generational mortality improvements projected from 2017 using 80% of Projection Scale MP-2020. 10% of Safety member active deaths are assumed to occur in the line of duty.

Mortality rates for healthy General annuitants are based on the sex distinct 2021 CalPERS Healthy Annuitant Mortality Table, with generational mortality improvements projected from 2017 using 80% of Projection Scale MP-2020, and a partial credibility adjustment of 1.05 for males and no adjustment for females.

Mortality rates for Safety annuitants are based on the sex distinct 2021 CalPERS Healthy Annuitant Mortality Table, with generational mortality improvements projected from 2017 using 80% of Projection Scale MP-2020, and a partial credibility adjustment of 1.05 for males and no adjustment for females.

13. Rates of Mortality for Disabled Retirees

Mortality rates for General disabled annuitants are based on status. Rates for General disabled annuitants with a service-related disability are based on the sex distinct 2021 CalPERS Industrially Disabled Annuitant Mortality Table, with generational mortality improvements projected from 2017 using 80% of Projection Scale MP-2020. Rates for General disabled annuitants with a non-service-related disability are based on the sex distinct 2021 CalPERS Non-Industrially Disabled Annuitant Mortality Table, with generational mortality improvements projected from 2017 using 80% of Projection Scale MP-2020.

Mortality rates for Safety disabled annuitants are based on the sex distinct 2021 CalPERS Industrially Disabled Mortality Table, with generational mortality improvements projected from 2017 using Projection 80% of Scale MP-2020.

14. Mortality Improvement

The mortality assumptions employ a fully generational mortality improvement projection from the base year of the CalPERS mortality tables (2017) using 80% of Scale MP-2020.

**SAN JOAQUIN COUNTY EMPLOYEES' RETIREMENT ASSOCIATION
ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

**APPENDIX B – STATEMENT OF CURRENT
ACTUARIAL ASSUMPTIONS AND METHODS**

15. Adjustment for Service Purchases

SJCERA provides Cheiron with the amount of service that active employees are eligible to purchase. We include this service when calculating the employees' benefit eligibility. Half of eligible service purchases, which have not been purchased by the members, are included in the employees' Credited Service, as employees will pay approximately half of the normal cost for these benefits when purchasing this service.

16. Assumptions for Employee Contribution Rates

Mortality rates are the base mortality tables described above, projected using 80% of Scale MP-2020 from 2017 to 2044 for General Members and to 2045 for Safety Members. The projection periods are based on the duration of active liabilities for the respective groups, and the period during which the associated contribution rates will be in use. The employee contribution rates are also blended using a male/female weighting of 29%/71% for General Members and 75%/25% for Safety members.

**SAN JOAQUIN COUNTY EMPLOYEES' RETIREMENT ASSOCIATION
ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

**APPENDIX B – STATEMENT OF CURRENT
ACTUARIAL ASSUMPTIONS AND METHODS**

17. Rates of Retirement

Rates of retirement are based on age and service according to the following table.

Rates of Retirement								
Age	General Male Years of Service			General Female Years of Service			Safety Years of Service	
	5-9	10-29	30+	5-9	10-29	30+	5-19	20+

**SAN JOAQUIN COUNTY EMPLOYEES' RETIREMENT ASSOCIATION
ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

**APPENDIX B – STATEMENT OF CURRENT
ACTUARIAL ASSUMPTIONS AND METHODS**

18. Changes in Assumptions

There have been no changes in the assumptions since the prior valuation. We are now using an annual COLA increase assumption of 2.75% for members in pay status. However, this assumption is only used to reflect the expected impact of events which have already occurred and thus do not represent a change in forward-looking assumptions.

**SAN JOAQUIN COUNTY EMPLOYEES' RETIREMENT ASSOCIATION
ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

APPENDIX C – SUMMARY OF PLAN PROVISIONS

A. Definitions

Compensation: Compensation means the cash remuneration for services paid by the employer. It includes base pay and certain differential, incentive, and special pay allowances defined by the Board of Retirement. Overtime is excluded, with the exception of overtime paid under the Fair Labor Standards Act that is regular and recurring.

For members joining the Plan on and after January 1, 2013 (Tier 2 Members), only pensionable compensation up to the PEPRA compensation limit (\$146,042 for 2023) will count for computing Plan benefits and employee contributions and employer contributions for those participating in Social Security. For those not participating in Social Security, the compensation cap is 120% of the PEPRA compensation limit (\$175,250 for 2023).

Members hired after January 1, 2022 are members of Tier 2B. For this tier, pensionable compensation is limited to base pay only. All other benefit provisions for this tier, including the PEPRA pensionable compensation caps, are the same as those for Tier 2.

Credited Service: In general, Credited Service is earned for the period during which Member Contributions are paid.

Temporary service for which the Member was not credited, or service for which the Member withdrew his or her Member Contributions, may be purchased by paying or repaying the Member Contributions with interest. Credit for up to 12 months of a medical leave of absence and all military leaves of absence may also be purchased.

Public Service (see below) is part of Credited Service for the computation of benefits only, not for eligibility for benefits or for vesting.

Final

Compensation: For Tier 1 Members, Final Compensation means the highest average Compensation earned during any 12 consecutive months of the Member's employment.

For Tier 2 and 2B Members, highest average Compensation will be based on the highest 36 consecutive months, rather than 12 months.

General Member: Any Member who is not a Safety Member is a General Member.

Public Service: The Member may elect to purchase Public Service for time spent while employed in another recognized public agency. The public agency must

**SAN JOAQUIN COUNTY EMPLOYEES' RETIREMENT ASSOCIATION
ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

APPENDIX C – SUMMARY OF PLAN PROVISIONS

have a reciprocal agreement with the Plan or be one of several specified municipalities, counties, special districts, or State or Federal agencies. Public Service cannot be purchased if it is used for eligibility for another pension.

The cost to purchase Public Service is twice the Member Contributions and interest applicable for the period of time purchased. Public Service is used to compute benefits but does not count toward eligibility for benefits or vesting.

Safety Member: Any sworn Member engaged in law enforcement, probation, or fire suppression is a Safety Member.

B. Membership

Eligibility: All full-time, permanent employees of San Joaquin County and other participating special districts become Members on their date of appointment. Membership is mandatory; only elected officials and members who are age 60 or older at the time of employment in a position requiring membership in SJCERA may choose not to participate.

A Tier 2 Member is any Member joining the Plan for the first time on or after January 1, 2013 (with members hired after January 1, 2022 being members of Tier 2B). Employees who transfer from and are eligible for reciprocity with another public employer will not be Tier 2/2B Members if their service in the reciprocal system was under a previous tier. Employees who were Members of SJCERA prior to January 1, 2013 and experienced a break in service of more than six months and then were reemployed by a *different* SJCERA-participating employer on or after January 1, 2013 will be considered Tier 2/2B Members for all subsequent service.

Member

Contributions: Each Member contributes a percentage of Compensation to the Plan through payroll deduction. For Tier 1 members, the percentage contributed depends on the Member's age upon joining the Plan. Representative rates are shown in Table 1 on the next page.

Tier 1 members covered by Social Security have their contributions reduced by one-third on the first \$161.54 of biweekly Compensation. General Members who joined the Plan prior to March 7, 1973 and who have earned 30 years of Credited Service do not contribute; Safety Members do not contribute after earning 30 years of Credited Service.

**SAN JOAQUIN COUNTY EMPLOYEES' RETIREMENT ASSOCIATION
ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

APPENDIX C – SUMMARY OF PLAN PROVISIONS

Table 1: Tier 1 Member Contribution Rates (Basic Rates)

Entry Age	General Member Rate		Safety Member Rate	
	1 st \$350/month	Over \$350	1 st \$350/month	Over \$350
20	2.09%	3.14%	3.14%	4.71%
25	2.30%	3.45%	3.36%	5.04%
30	2.53%	3.79%	3.61%	5.41%
35	2.78%	4.17%	3.88%	5.82%
40	3.07%	4.60%	4.22%	6.33%
45	3.35%	5.02%	4.59%	6.89%
50	3.61%	5.41%	4.36%	6.54%

Rates include the employee share of the administrative expenses.

Some Tier 1 members also contribute half of the normal cost associated with the post-retirement COLA benefits, also based on entry age. Many bargaining groups have also agreed to have their Tier 1 members pay additional basic rate contributions (14% of the current basic rates for General members, 33% for Safety). The complete rate tables for all groups are in the Appendix G.

Tier 2/2B Members contribute half of the normal cost of the Plan. Contributions for these Members are based on the Normal Cost associated with their benefits; General and Safety members pay different rates.

Tier 2/2B Members pay a single contribution rate, not a rate based on entry age. All Tier 2/2B Members continue contributing after earning 30 years of service. These rates are updated annually, to reflect changes in the Tier 2/2B demographics, as well as any changes in assumptions (such as the discount rate change).

Table 2: Tier 2 Member Contribution Rates

General Member Rate	Safety Member Rate
10.06%	15.74%

Rates include the employee share of the administrative expenses.

Interest is credited semiannually to each Member's accumulated contributions, based on the previous year's expected rate of return on assets. The crediting rate for 2023 is 3.3199%, for an effective annual rate of 6.75%.

**SAN JOAQUIN COUNTY EMPLOYEES' RETIREMENT ASSOCIATION
ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

APPENDIX C – SUMMARY OF PLAN PROVISIONS

C. Service Retirement

Eligibility: Tier 1 General Members are eligible to retire at age 50 if they have earned five years of Credited Service and have passed the tenth anniversary of their membership in the Plan. Alternatively, General Members are eligible to retire at any age after having earned 30 years of Credited Service, or upon reaching age 70 with no service requirement.

Tier 1 Safety Members are eligible to retire at age 50 if they have earned five years of Credited Service and have passed the tenth anniversary of their membership in the Plan. Alternatively, Safety Members are eligible to retire at any age after having earned 20 years of Credited Service.

Tier 2/2B General Members are eligible to retire upon attaining age 52 and completing five or more years of service. Tier 2/2B Safety Members are eligible to retire upon attaining age 50 and completing five or more years of service. Tier 2/2B Members are eligible to retire, regardless of service, after attaining age 70.

Benefit Amount: The Service Retirement Benefit payable to Tier 1 General Members is equal to the percentage in Table 3 on the next page multiplied by the Member's Final Compensation. The Service Retirement Benefit payable to Tier 1 Safety Members is equal to the percentage in the upcoming Table 4 multiplied by the Member's Final Compensation. The percentage of Final Compensation may not exceed 100%. For those Tier 1 members integrated with Social Security, Retirement Benefits based on the first \$350 of monthly Final Average Compensation are reduced by one-third.

63	\$3.046	\$3.500
64	\$3.046	\$3.500
65	\$3.046	\$3.500

For Tier 2/2B General Members, the benefit multiplier is 1% at age 52, increasing by 0.1% for each year of age to 2.5% at 67. For Tier 2/2B Safety Members, the benefit multiplier is 2% at age 50, increasing by 0.1% for each year of age to 2.7% at age 57. In between exact ages, the multiplier increases by 0.025% for each quarter year increase in age.

Form of Benefit: The Service Retirement Benefit will be paid monthly beginning at retirement and for the life of the Member. If the member selects the unmodified benefit form, in the event of the Member's death, 60% of the benefit will continue for the life of the Member's spouse, or to the age of majority of dependent minor children if there is no spouse. In the event there is no surviving spouse or minor children, any unpaid remainder of the Member's accumulated contributions will be paid to the Member's designated beneficiary.

**SAN JOAQUIN COUNTY EMPLOYEES' RETIREMENT ASSOCIATION
ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

APPENDIX C – SUMMARY OF PLAN PROVISIONS

Actuarially equivalent optional benefit forms are also available.

Annually on April 1, benefits are adjusted to reflect changes in the CPI for the San Francisco Bay Area. Annual adjustments may not exceed 3%, but changes in CPI in excess of 3% are “banked” and used for future adjustments when changes in CPI are less than 3%.

In addition, ad hoc cost-of-living adjustments have been granted in the past and may be granted in the future.

A lump sum benefit of \$5,000 will be payable upon the death of a retired member.

D. Service-Connected Disability

Eligibility: Members are eligible for Service-Connected Disability Retirement benefits at any age if they are permanently disabled as a result of injuries or illness sustained in the line of duty.

Benefit Amount: The Service-Connected Disability Retirement Benefit payable to Members is equal to the greater of 50% of their Final Compensation or – if the Member is eligible at disability for a Service Retirement Benefit – the Service Retirement Benefit accrued on the date of disability.

Members who return to work at a different position with lower pay may receive a Supplemental Disability Allowance that, when added to their new pay, may bring the Member’s total income up to the current pay for his or her position at the time of disability. The Supplemental Disability Allowance may not exceed the Service-Connected Disability Retirement benefit.

Form of Benefit: The Service-Connected Disability Retirement Benefit will be paid monthly beginning at the effective date of disability retirement and for the life of the Member; in the event of the Member’s death, 100% of the benefit will continue for the life of the Member’s spouse, or to the age of majority of dependent minor children if there is no spouse. In the event there is no surviving spouse or minor children, any unpaid remainder of the Member’s accumulated contributions will be paid to the Member’s designated beneficiary.

Actuarially equivalent optional benefit forms are also available.

Annually on April 1, benefits are adjusted to reflect changes in the CPI for the San Francisco Bay Area. Annual adjustments may not exceed 3%, but

changes in CPI in excess of 3% are “banked” and used for future adjustments when changes in CPI are less than 3%.

In addition, ad hoc cost-of-living adjustments have been granted in the past and may be granted in the future.

A lump sum benefit of \$5,000 will be payable upon the death of a retired member.

E. Nonservice-Connected Disability

Eligibility: Members are eligible for Nonservice-Connected Disability Retirement benefits if they are permanently disabled at any age after earning five years of Credited Service or after becoming eligible for a deferred vested benefit.

Benefit Amount: The Nonservice-Connected Disability Retirement Benefit payable to General Members is equal to the greatest of:

- 1.5% of Final Compensation at disability multiplied by years of Credited Service at disability;
- 1.5% of Final Compensation at disability multiplied by years of Credited Service projected to age 65, but not to exceed one-third of Final Compensation; or
- If the Member is eligible at disability for a Service Retirement Benefit, the Service Retirement Benefit accrued on the date of disability.

The Nonservice-Connected Disability Retirement Benefit payable to Safety Members is equal to the greatest of:

- 1.8% of Final Compensation at disability multiplied by years of Credited Service at disability;
- 1.8% of Final Compensation at disability multiplied by years of Credited Service projected to age 55, but not to exceed one-third of Final Compensation; or
- If the Member is eligible at disability for a Service Retirement Benefit, the Service Retirement Benefit accrued on the date of disability.

Members who return to work at a different position with lower pay may receive a Supplemental Disability Allowance that, when added to their new pay, may bring the Member's total income up to the current pay for his or her position at the time of disability. The Supplemental Disability

**SAN JOAQUIN COUNTY EMPLOYEES' RETIREMENT ASSOCIATION
ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

APPENDIX C – SUMMARY OF PLAN PROVISIONS

Allowance may not exceed the Nonservice-Connected Disability Retirement benefit.

Form of Benefit: The Nonservice-Connected Disability Retirement Benefit will be paid monthly beginning at the effective date of disability retirement, and for the life of the Member; in the event of the Member's death, 60% of the benefit will continue for the life of the Member's spouse or to the age of majority of dependent minor children if there is no spouse. In the event there is no surviving spouse or minor children, any unpaid remainder of the Member's accumulated contributions will be paid to the Member's designated beneficiary.

Actuarially equivalent optional benefit forms are also available.

Annually on April 1, benefits are adjusted to reflect changes in the CPI for the San Francisco Bay Area. Annual adjustments may not exceed 3%, but changes in CPI in excess of 3% are "banked" and used for future adjustments when changes in CPI are less than 3%.

In addition, ad hoc cost-of-living adjustments have been granted in the past and may be granted in the future.

A lump sum benefit of \$5,000 will be payable upon the death of a retired member.

F. Service-Connected Death

Eligibility: A Member's survivors are eligible to receive Service-Connected Death benefits if the Member's death resulted from injury or illness sustained in connection with the Member's duties.

Benefit Amount: The Service-Connected Death benefit payable to a surviving spouse or minor children will be 50% of the Member's Final Compensation.

In the event the Member's death was caused by external violence or physical force, an additional benefit of 25% of the above basic benefit will be paid for the first minor child, 15% for the second, and 10% for the third.

Furthermore, for Safety Members only, there will be an additional lump sum benefit of 12 months of pay at the time of death.

Form of Benefit: The Service-Connected Death Benefit will be paid monthly beginning at the Member's death and for the life of the surviving spouse or to the age of majority of dependent minor children if there is no spouse.

ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

APPENDIX C – SUMMARY OF PLAN PROVISIONS

Annually on April 1, benefits are adjusted to reflect changes in the CPI for the San Francisco Bay Area. Annual adjustments may not exceed 3%, but changes in CPI in excess of 3% are “banked” and used for future adjustments when changes in CPI are less than 3%.

In addition, ad hoc cost-of-living adjustments have been granted in the past and may be granted in the future.

G. Nonservice-Connected Death

Eligibility: A Member’s survivors are eligible to receive Nonservice-Connected Death benefits if the Member’s death arose from causes unrelated to the Member’s duties.

Benefit Amount: In the event the Member had earned fewer than five years of Credited Service and has no or insufficient reciprocity service from another system, the Nonservice-Connected Death benefit will be a refund of the Member’s accumulated contributions with interest plus a payment of one month of Final Compensation for each year of Credited Service, not to exceed six months.

In the event the Member had earned five or more years of Credited Service, the Nonservice-Connected Death benefit payable to a surviving spouse or minor children will be 60% of the amount the Member would have received as a Nonservice-Connected Disability Retirement Benefit on the date of death.

Form of Benefit: For Members who had earned fewer than five years of Credited Service at death, the benefit will be paid as a lump sum.

For Members with five or more years of Credited Service, the Nonservice-Connected Death Benefit will be paid monthly beginning at the Member’s death and for the life of the surviving spouse or to the age of majority of dependent minor children if there is no spouse.

Annually on April 1, benefits are adjusted to reflect changes in the CPI for the San Francisco Bay Area. Annual adjustments may not exceed 3%, but changes in CPI in excess of 3% are “banked” and used for future adjustments when changes in CPI are less than 3%.

In addition, ad hoc cost-of-living adjustments have been granted in the past and may be granted in the future.

ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

APPENDIX C – SUMMARY OF PLAN PROVISIONS

H. Withdrawal Benefit

- Eligibility: A Member is eligible for a Withdrawal Benefit upon termination of employment.
- Benefit Amount: The Withdrawal Benefit is a refund of the Member's accumulated contributions with interest. Upon receipt of the Withdrawal Benefit, the Member forfeits all Credited Service.
- Form of Benefit: The Withdrawal Benefit is paid in a lump sum upon election by the Member.

I. Deferred Vested Benefit

- Eligibility: A Member is eligible for a Deferred Vested Benefit upon termination of employment after earning five years of Credited Service, including reciprocity service from another system. The Member must leave his or her Member Contributions with interest on deposit with the Plan.
- Benefit Amount: The Deferred Vested Benefit is computed in the same manner as the Service Retirement Benefit, but it is based on Credited Service and Final Compensation on the date of termination.

For Tier 1 Members, Tables 2 and 3 are extended for service under 10 years using benefit multipliers of one-sixtieth per year of Credited Service at age 52 (General) or 3% per year of Credited Service at age 50 (Safety), with adjustments for earlier or later retirement under Sections 31676.14 and 31664.1, respectively, of the County Employees Retirement Law of 1937.

- Form of Benefit: The Deferred Vested Benefit will be paid monthly beginning at retirement and for the life of the Member; in the event of the Member's death, 60% of the benefit will continue for the life of the Member's spouse or to the age of majority of dependent minor children if there is no spouse. In the event there is no surviving spouse or minor children, any unpaid remainder of the Member's accumulated contributions will be paid to the Member's designated beneficiary.

Actuarially equivalent optional benefit forms are also available.

Annually on April 1, benefits are adjusted to reflect changes in the CPI for the San Francisco Bay Area. Annual adjustments may not exceed 3%, but changes in CPI in excess of 3% are "banked" and used for future adjustments when changes in CPI are less than 3%.

**SAN JOAQUIN COUNTY EMPLOYEES' RETIREMENT ASSOCIATION
ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

APPENDIX C – SUMMARY OF PLAN PROVISIONS

In addition, ad hoc cost-of-living adjustments have been granted in the past and may be granted in the future.

A lump sum benefit of \$5,000 will be payable upon the death of a retired member.

J. Reciprocal Benefit

Eligibility: A Member is eligible for a Reciprocal Benefit upon termination of employment and entry, within a specified period of time, into another retirement system recognized as a reciprocal system by the Plan. In addition, the Member must leave his or her Member Contributions with interest on deposit with the Plan.

Benefit Amount: The Reciprocal Benefit is computed in the same manner as the Service Retirement Benefit, but it is based on Credited Service on the date of termination and Final Compensation on the date of retirement; Final Compensation is based on the highest of the Compensation earned under this Plan or the reciprocal plan.

Form of Benefit: The Reciprocal Benefit will be paid monthly beginning at retirement and for the life of the Member; in the event of the Member's death, 60% of the benefit will continue for the life of the Member's spouse or to the age of majority of dependent minor children if there is no spouse. In the event there is no surviving spouse or minor children, any unpaid remainder of the Member's accumulated contributions will be paid to the Member's designated beneficiary.

Actuarially equivalent optional benefit forms are also available.

Annually on April 1, benefits are adjusted to reflect changes in the CPI for the San Francisco Bay Area. Annual adjustments may not exceed 3%, but changes in CPI in excess of 3% are "banked" and used for future adjustments when changes in CPI are less than 3%.

A lump sum benefit may be payable upon the death of a retired Member by the last system under which the Member's service was covered.

There have been no changes in plan provisions since the prior valuation.

ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

APPENDIX D – 401(H) REPAYMENT SCHEDULE

As of January 1, 2014, a separate amortization layer was established for the repayment of funds originally transferred to a retiree health reserve. This schedule was prepared in compliance with an approved Voluntary Correction Program that SJCERA submitted to the IRS. The original balance of the amortization layer (\$48.0 million) is being amortized using the same methodology and assumptions as the UAL – as a level percentage of payroll over a 19-year period – after an initial payment of \$19.8 million.

Date	Outstanding Balance	Years Remaining	End of Year Payment
1/1/2017	\$27,547,546	16	\$2,460,275
1/1/2018	\$27,125,789	15	\$2,512,141
1/1/2019	\$26,580,267	14	\$2,591,274
1/1/2020	\$25,916,063	13	\$2,653,902
1/1/2021	\$25,076,285	12	\$2,733,519
1/1/2022	\$24,098,107	11	\$2,778,677
1/1/2023	\$22,946,052	10	\$2,862,037
1/1/2024	\$21,632,873	9	\$2,947,899
1/1/2025	\$20,145,193	8	\$3,036,335
1/1/2026	\$18,468,658	7	\$3,127,426

1/1/2028	\$14,486,300	5	\$3,317,886
1/1/2029	\$12,146,239	4	\$3,417,422
1/1/2030	\$9,548,688	3	\$3,519,945
1/1/2031	\$6,673,279	2	\$3,625,543
1/1/2032	\$3,498,182	1	\$3,734,310
1/1/2033	\$0	0	\$0

**SAN JOAQUIN COUNTY EMPLOYEES' RETIREMENT ASSOCIATION
ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

APPENDIX E – GLOSSARY

1. Actuarial Assumptions

Assumptions as to the occurrence of future events affecting pension costs such as mortality, withdrawal, disability, retirement, changes in compensation, and rates of investment return.

2. Actuarial Cost Method

A procedure for determining the actuarial present value of pension plan benefits and expenses and for developing an allocation of such value to each year of service, usually in the form of a normal cost and an Actuarial Liability.

3. Actuarial Gain (Loss)

The difference between actual experience and that expected based upon a set of actuarial assumptions during the period between two actuarial valuation dates, as determined in accordance with a particular actuarial cost method.

4. Actuarial Liability

The portion of the actuarial present value of projected benefits that will not be paid by future normal costs. It represents the value of the past normal costs with interest to the valuation date.

5. Actuarial Present Value (Present Value)

The value as of a given date of a future amount or series of payments. The actuarial present value discounts the payments to the given date at the assumed investment return and includes the probability of the payment being made.

6. Actuarial Valuation

The determination, as of a specified date, of the normal cost, Actuarial Liability, Actuarial Value of Assets, and related actuarial present values for a pension plan.

7. Actuarial Value of Assets

The value of cash, investments, and other property belonging to a pension plan as used by the actuary for the purpose of an actuarial valuation. The purpose of an Actuarial Value of Assets is to smooth out fluctuations in market values.

8. Actuarially Equivalent

Of equal actuarial present value, determined as of a given date, with each value based on the same set of actuarial assumptions.

**SAN JOAQUIN COUNTY EMPLOYEES' RETIREMENT ASSOCIATION
ACTUARIAL VALUATION REPORT AS OF JANUARY 1, 2023**

APPENDIX E – GLOSSARY

9. Amortization Payment

The portion of the pension plan contribution that is designed to pay interest and principal on the Unfunded Actuarial Liability in order to pay for that liability in a given number of years.

10. Entry Age Normal Actuarial Cost Method

A method under which the actuarial present value of the projected benefits of each individual included in an actuarial valuation is allocated on a level basis over the earnings of the individual between entry age and assumed exit ages.

11. Funded Ratio

The ratio of the Actuarial Value of Assets to the Actuarial Liabilities. The funded ratio shown in this report is not appropriate for assessing the sufficiency of plan assets to cover the estimated cost of settling the plan's benefit obligations, in the case of a plan termination or other similar action. However, it is an appropriate measure for assessing the need for or the amount of future contributions.

12. Inactive Funded Ratio

The ratio of the Inactive Actuarial Liabilities to the total Actuarial Liabilities. The inactive funded ratio is a measure that shows the minimum funded status needed to pay benefits for all inactive members.

13. Normal Cost

That portion of the actuarial present value of pension plan benefits and expenses, which is allocated to a valuation year by the actuarial cost method.

14. Projected Benefits

Those pension plan benefit amounts which are expected to be paid in the future under a particular set of actuarial assumptions, taking into account such items as increases in future compensation and service credits.

15. Unfunded Actuarial Liability

The excess of the Actuarial Liability over the Actuarial Value of Assets.
