Retirement Board of San Joaquin County Employees' Retirement Association 220 East Channel Street Stockton, California 95202

Dear Members of the Board:

The purpose of this report is to provide accounting and financial reporting information under GASB 67 for the San Joaquin County Employees' Retirement Association (SJCERA, the System, the Fund, the Plan) and under GASB 68 for the County of San Joaquin and the other participating employers. This information includes:

- Projection of SJCERA's Total Pension Liability from the valuation date to the measurement date.
- Note disclosures and required supplementary information under GASB 67 for SJCERA,
- Determination of collective amounts under GASB 68, and
- Schedules for the financial reporting of participating employers under GASB 68.

If you have any questions about the report or would like additional information, please let us know.

Sincerely, Cheiron

Graham A. Schmidt, FSA, EA, MAAA, FCA

Principal Consulting Actuary

Timothy S. Doyle, ASA, EA, MAAA Associate Actuary

Anne D. Harper, FSA, EA, MAAA Principal Consulting Actuary

SECTION I – BOARD SUMMARY

Highlights

The measurement date for the San Joaquin County Employees' Retirement Association (SJCERA) is December 31, 2023. Measurements are based on the fair value of assets as of December 31, 2023 and the Total Pension Liability as of the valuation date, January 1, 2023, updated to December 31, 2023. There were no significant events between the valuation date and the measurement date, so the update procedures consisted of the addition of service cost and interest cost offset by actual benefit payments.

Effective January 1, 2017, the County began making additional employer contributions above the Actuarial Determined Contribution to increase funding to the Plan. The County made an additional contribution of \$25.0 million in 2023. The Superior Court of California County of San Joaquin also began making additional employer contributions to the Plan in 2019, and made an additional contribution of \$1.5 million in 2023. Effective October 16, 2018, the San Joaquin Mosquito and Vector Control District began making additional employer contributions above the Actuarial Determined Contribution and contributed \$100,000 in 2023.

The value of the Plan's Net Fiduciary Position includes \$237.8 million for all three separately tracked Additional Contribution Reserves (County, Superior Courts, and Mosquito and Vector Control District), including interest credits. Under GASB 68 reporting, these Additional Contribution Reserves are allocated directly to the County, Superior Court, and Mosquito District and offsets their Net Pension Liability (NPL) with no impact on the other employers' NPL.

SECTION I – BOARD SUMMARY

The table below provides a summary of the key collective results during this measurement period.

Ta Summary of C	ble I-			
		Measurer	ne n	t Date
		12/31/2023		12/31/2022
Net Pension Liability	\$	1,670,601,243	\$	1,699,389,350
Deferred Outflows		(362,496,494)		(368,830,608)
Deferred Inflows		76,484,698		110,923,725
Net Impact on Statement of Net Position	\$	1,384,589,447	\$	1,441,482,467
Pension Expense (\$ Amount)	\$	235,859,291	\$	235,649,516
Pension Expense (% of Payroll)		44.04%		48.68%

The Net Pension Liability (NPL) decreased approximately \$28.8 million since the prior measurement date, due to investment gains and contributions (including additional contributions by the County, Superior Courts, and Mosquito and Vector Control District), offset by experience losses. The investment gains are recognized over five years, and the liability experience losses are recognized over the average remaining service life, which is now four years.

Unrecognized amounts are reported as deferred inflows and deferred outflows. As of the end of the reporting year, SJCERA and its participating employers would report a Net Pension Liability of \$1,670,601,243, Deferred Inflows of \$76,484,698, and Deferred Outflows of \$362,496,494. Consequently, the net impact on the aggregate of participating employers' Statements of Net Position due to SJCERA would be \$1,384,589,447 at the end of the measurement year (\$1,670,601,243 + \$76,484,698 - \$362,496,494). In addition, any contributions between the measurement date and each individual employer's reporting date would be reported as deferred outflows to offset the cash outflow reported.

For the measurement year ending December 31, 2023, the collective annual pension expense is \$235,859,291 or 44.04% of covered payroll. This amount is not related to participating employers' contributions to SJCERA (\$292,752,311), but instead represents the change in the net impact on participating employer's Statements of Net Position plus employer contributions (\$1,384,589,447 – \$1,441,482,467 + \$292,752,311).

The collective pension expense increased by \$209,775 from the prior year. Although there was little change this year, volatility in the pension expense from year to year is generally to be expected. It will largely be driven by investment gains or losses, but other changes can also have a significant impact, such as the impact of assumption changes. A breakdown of the components of the net pension expense is shown in Table VI-2 of this report.

SECTION II - CERTIFICATION

The purpose of this report is to provide accounting and financial reporting information under GASB 67 for the San Joaquin County Employees' Retirement Association (SJCERA) and under GASB 68 for the employers that participate in SJCERA. This report is for the use of SJCERA, the participating employers, and their auditors in preparing financial reports in accordance with applicable law and accounting requirements. This report is not appropriate for other purposes, including the measurement of funding requirements for SJCERA and estimating the price to settle SJCERA's obligations.

In preparing our report, we relied on information (some oral and some written) supplied by SJCERA. This information includes, but is not limited to, the plan provisions, employee data, and financial information. We performed an informal examination of the obvious characteristics of the data for reasonableness and consistency in accordance with Actuarial Standard of Practice No. 23.

Future actuarial measurements may differ significantly from the current measurements due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; and changes in plan provisions or applicable law.

Cheiron utilizes ProVal, an actuarial valuation application leased from Winklevoss Technologies (WinTech) to calculate liabilities and project benefit payments. We have relied on WinTech as the developer of ProVal. We have reviewed ProVal and have a basic understanding of it and have used ProVal in accordance with its original intended purpose. We have not identified any material inconsistencies in assumptions or output of ProVal that would affect this report.

This report and its contents have been prepared in accordance with generally recognized and accepted actuarial principles and practices that are consistent with our understanding of the Code of Professional Conduct and applicable Actuarial Standards of Practice set out by the Actuarial Standards Board as well as applicable laws and regulations. Furthermore, as credentialed actuaries, we meet the Qualification Standards of the American Academy of Actuaries to render the opinion contained in this report. This report does not address any contractual or legal issues. We are not attorneys and our firm does not provide any legal services or advice.

This report was prepared for SJCERA for the purposes described herein and for the use by the plan auditor in completing an audit related to the matters herein. Other users of this report are not intended users as defined in the Actuarial Standards of Practice, and Cheiron assumes no duty or liability to any other user.

SECTION III - DETERMINATION OF DISCOUNT RATE

The discount rate used to measure the Total Pension Liability was 6.75%.

We have assumed that the employees will continue to contribute to the Plan at the required rates and the employers will continue the historical and legally required practice of contributing to the Plan based on an Actuarially Determined Contribution, reflecting a payment equal to annual normal cost, a portion of the expected administrative expenses, an amortization payment for the extraordinary losses of 2008 over a closed period (16 years remaining as of January 1, 2023), and an amount necessary to amortize the remaining January 1, 2014 Unfunded Actuarial Liability as a level percentage of payroll over a closed period (10 years remaining as of January 1, 2023). Any subsequent unexpected change in the Unfunded Actuarial Liability (UAL) after January 1, 2014 is amortized over 15 years, with new amortization layers each year. The amortization period for each layer of the remaining UAL will decrease each year.

We have not performed a formal cash flow projection as described under Paragraph 41 of GASB Statement 67. However, Paragraph 43 allows for alternative methods to confirm the sufficiency of the Net Position if the evaluations "can be made with sufficient reliability without a separate projection of cash flows into and out of the pension plan..." In our professional judgment, adherence to the actuarial funding policy described above will result in the pension plan's projected Fiduciary Net Position being greater than or equal to the benefit payments projected for each future period.

Therefore, the long-term expected rate of return on Plan investments was applied to all periods of projected benefit payments to determine the Total Pension Liability.

SECTION IV - PROJECTION OF TOTAL PENSION LIABILITY

The Total Pension Liability (TPL) at the end of the measurement year, December 31, 2023, is measured as of a valuation date of January 1, 2023 and projected to December 31, 2023. The TPL shown in the prior GASB report was measured as of January 1, 2022 and projected to December 31, 2022. Because the TPLs are based on different valuations and different assumptions, the December 31, 2022 TPL will not match the amounts measured as of January 1, 2023 that are shown in this exhibit.

There were no significant events during the projection period of which we are aware.

The table below shows the projection of the TPL at discount rates equal to the rate used for disclosure and plus and minus one percent from the rate used for disclosure.

Projection of Collective Total Pensio		ble IV-1 iability from V	Valu	ration to Meas	ure	ement Date
Discount Rate		5.75%		6.75%		7.75%
Valuation Collective Total Pension Liability, 1	/1/20	023

Collective Total Pension Liability, 12/31/2023	\$	6,669,021,356	\$	5,886,299,407	\$	5,241,120,089

SECTION V – GASB 67 REPORTING INFORMATION

Note Disclosures

The table below shows the changes in the Total Pension Liability, the Plan Fiduciary Net Position (i.e., fair value of System assets), and the Net Pension Liability during the measurement year.

			Incre	ease (Decrease)		
	Т	otal Pension Liability (a)		lan Fiduciary Net Position (b)]	Net Pension Liability (a) - (b)
Balances at 12/31/2022	\$	5,517,142,112	\$	3,817,752,762	\$	1,699,389,350
Changes for the year:						
Service cost		124,642,194				124,642,194
Interest		366,899,543				366,899,543
Changes of benefits		0				C
Differences between expected and actual experience		168,153,229				168,153,229
Changes of assumptions		0				(
Contributions - employer				292,752,311		(292,752,311
Contributions - member				54,934,141		(54,934,141
Transfer to healthcare plan				(219,676)		219,676
Net investment income				347,666,062		(347,666,062
Benefit payments		(290,537,671)		(290,537,671)		(
Administrative expense				(6,649,765)		6,649,765
Net changes		369,157,295		397,945,402		(28,788,107
Balances at 12/31/2023	\$	5,886,299,407	\$	4,215,698,164	\$	1,670,601,243

^{*} Numbers may not sum to total due to rounding.

During the measurement year, the collective NPL decreased by approximately \$28.8 million. The service cost and interest cost increased the collective NPL by approximately \$491.5 million, while contributions and investment income offset by administrative expenses and plan transfers decreased the collective NPL by an additional \$688.5 million.

Differences between expected and actual experience increased the NPL by approximately \$168.2 million.

The TPL as of December 31, 2023 was based upon the same data, actuarial methods and assumptions, and plan provisions as were used in the actuarial valuation as of January 1, 2023, and which are summarized in the actuarial valuation report as of January 1, 2023. The TPL no longer includes an estimate of liabilities for the Post-82 Settlement benefits, as payments from the reserve were suspended in 2017.

SECTION V – GASB 67 REPORTING INFORMATION

Changes in the discount rate affect the measurement of the TPL. Lower discount rates produce a higher TPL and higher discount rates produce a lower TPL. Because the discount rate does not affect the measurement of assets, the percentage change in the NPL can be very significant for a relatively small change in the discount rate. The table below shows the sensitivity of the collective NPL to the discount rate.

Table V-2 Sensitivity of Collective Net Pension Liability to Changes in Discount Rate*											
		1% Decrease 5.75%		Discount Rate 6.75%		1% Increase 7.75%					
Total Pension Liability Plan Fiduciary Net Position	\$	6,669,021,356 4,215,698,164	\$	5,886,299,407 4,215,698,164	\$	5,241,120,089 4,215,698,164					
Collective Net Pension Liability Plan Fiduciary Net Position as a Percentage of the Total Pension Liability	<u>\$</u>	2,453,323,192	<u>\$</u>	1,670,601,243 71.6%	<u>\$</u>	1,025,421,925 80.4%					

A one percent decrease in the discount rate increases the TPL by approximately 13% and increases the collective NPL by approximately 47%. A one percent increase in the discount rate decreases the TPL by approximately 11% and decreases the collective NPL by approximately 39%.

SECTION V – GASB 67 REPORTING INFORMATION

Required Supplementary Information

The notes below summarize the key methods and assumptions used to determine the ADC for FYE 2023.

Notes to Schedule

Valuation Date 1/1/2022

Timing Actuarially determined contribution rates are calculated based on the actuarial valuation one year prior to the beginning of the plan year

Key Methods and Assumptions Used to Determine Contribution Rates for the Year Ending December 31, 2023:

Asset valuation method Actuarial value: Excess earnings smoothed over five years, 80% / 120% corridor around market value

Amortization method As of January 1, 2015, level percentage of payroll with separate periods for remaining 1/1/2014 UAL (11 years as of 1/1/2022), Extraordinary Actuarial Gains

or Losses (17 years for 2008 losses as of 1/1/2022), and any future actuarial gains and losses over 15 years

Discount rate 6.75% net of investment expenses

Amortization growth rate 3.00% Price inflation 2.75%

Salary increases 3.00% plus merit component based on employee classification and years of service

Mortality Sex distinct tables from the CALPERS 2021 mortality tables, with generational mortality improvements projected from 2017 using 80% of Projection Scale MP-2020

A complete description of the methods and assumptions used to determine contribution rates for the year ending December 31, 2023 can be found in the January 1, 2022 Actuarial Valuation Report.

SECTION VI – GASB 68 COLLECTIVE INFORMATION

Employers that participate in SJCERA were required to implement GASB 68 for their first fiscal year that commenced after June 15, 2014. The amounts reported as of their fiscal year end (their reporting date) must be based on a measurement date not more than 12 months prior to their reporting date. For employers with a reporting date of June 30, their 2024 disclosures can be based on the December 31, 2023 measurement date.

Because SJCERA is a cost-sharing multiple-employer pension plan, each employer participating in SJCERA must reflect a portion of the collective Net Pension Liability, Pension Expense, and Deferred Outflows and Inflows in its financial statements. This section develops the collective amounts that are allocated to participating employers.

The impact of experience gains or losses and assumption changes on the TPL are recognized in expense over the average expected remaining service life of all active and inactive members of SJCERA. As of the measurement date, the remaining service life is 4.40 years, which has been rounded to four years for determining the recognition period. It was five years from 2019 to 2022.

The table below summarizes the current balances of collective deferred outflows and deferred inflows of resources along with the net recognition over the next five years.

Table V Schedule of Collective Deferred Infl		and Outflow	s of]	Resources
		Deferred Outflows of Resources		Deferred Inflows of Resources

SECTION VI – GASB 68 COLLECTIVE INFORMATION

The collective annual pension expense recognized by the participating employers can be calculated two different ways. First, it is the change in the amounts reported on the participating employers' Statements of Net Position that relate to SJCERA and are not attributable to employer contributions. That is, it is the change in collective NPL plus the changes in collective deferred outflows and inflows plus participating employer contributions.

Alternatively, annual pension expense can be calculated by its individual components. While GASB does not require or suggest the organization of the individual components shown below, we believe it helps to understand the level and volatility of the collective pension expense.

Table VI Calculation of Collective		ension Expe	nse	*
		Measurement 2023	t Ye	ar Ending 2022
Change in Net Pension Liability	\$	(28,788,107)	\$	480,177,569

Total	\$	51,742,250	\$	87,017,853
Pension Expense	\$	235,859,291	\$	235,649,516

^{*} Numbers may not sum to total due to rounding.

SECTION VI – GASB 68 COLLECTIVE INFORMATION

Operating expenses are items directly attributable to the operation of the plan during the measurement year. Service cost less employee contributions and other transfers represents the increase in employer-provided benefits attributable to the year, and administrative expenses are the cost of operating SJCERA for the year.

Financing expenses equal the interest on the Total Pension Liability less the expected return on assets. Since the discount rate is equal to the long-term expected return on assets, the financing expense is just the interest on the Net Pension Liability, adjusted for cash flow timing.

The recognition of changes will drive most of the volatility in pension expense from year to year. It includes any changes in benefits made during the year and the recognized amounts due to assumption changes, gains, or losses on the TPL, and investment gains or losses.

The total collective pension expense increased by about \$210,000 with a reduction of \$35.3 million attributable to the recognition of changes, a reduction of \$110,000 attributable to a decrease in operating expenses, and a \$35.6 million increase in financing expenses. The increase in financing expenses was mostly offset by the decrease of the recognition of changes, resulting in a small increase in the pension expense.

SECTION VII – GASB 68 REPORTING INFORMATION FOR PARTICIPATING EMPLOYERS

Proportionate Shares

Because SJCERA is a cost-sharing multiple-employer pension plan, each employer participating in SJCERA must reflect a portion of the collective Net Pension Liability, Pension Expense, and Deferred Outflows and Inflows in its financial statements. GASB 68 requires that the Proportionate Share for each employer shall be determined based on the "employer's projected long-term contribution effort to the pension ... as compared to the total projected long-term contribution effort of all employers ..."

The following schedules include the proportionate shares for each employer, reflecting a methodology that allocates the NPL and Pension Expense based on each employer's share of the Unfunded Liability amortization payments. In Table VII-1, each employer's amortization share as of December 31, 2023 is determined by multiplying the actual pensionable payroll for the current Plan year by the employer's amortization rate from the most recent actuarial valuation report (the report as of January 1, 2023). Beginning with the FYE 2017 report, the proportionate shares were adjusted to account for additional contributions made by the County of San Joaquin, the San Joaquin Mosquito and Vector Control District, and the Superior Court.

Total	100.0000%	\$2,453,323,192	\$ 1,670,601,243	\$ 1,025,421,925	\$ 362,496,494	\$ 76,484,698	\$ 235,859,291					

^{*} Numbers may not sum to total due to rounding.

The proportionate share allocated to each individual employer will change on each measurement date. The net effect of the change in proportion on the share of the collective NPL, collective deferred outflows, and collective deferred inflows allocated to each employer becomes a deferred outflow or inflow for that employer and is recognized over the average future working life of SJCERA's active and inactive members (4.40 years, which has been rounded to four years).

If the proportionate share for an employer increases, a portion of the resulting increase in the NPL will be recognized in the current year as an increase in the employer's pension expense, with the remainder acting as deferred outflows to be recognized in future years' pension expense. The reverse will be true for reductions in the proportionate share; i.e., reductions in the NPL will be recognized as offset to current and future years' pension expense.

SECTION VII – GASB 68 REPORTING INFORMATION FOR PARTICIPATING EMPLOYERS

Similarly, the difference between each employer's actual contributions and the employer's proportionate share of collective employer contributions becomes a deferred outflow or inflow for that employer and is recognized over the average future working life of SJCERA's active and inactive members.

If an employer contributes an amount greater than its proportionate share of the total contributions, the difference increases the current year pension expense and results in deferred outflows to be recognized in future years' pension expense. The reverse will be true for contributions less than the proportionate share; the difference will be recognized as a decrease to current and future years' pension expense.

The table below shows the change in proportion and the impact of that change in proportion on the proportionate share of the collective NPL, collective deferred outflows, and collective deferred inflows. It also shows any contribution differences.

^{*} Numbers may not sum to total due to rounding.

County of San Joaquin made additional contributions of \$25,039,922.

Superior Courts made additional contributions of \$1,500,000.

SJC Mosquito & Vector Control District made additional contributions of \$100,000.

APPENDIX A – GLOSSARY OF TERMS

1. Actuarially Determined Contribution

A target or recommended contribution for the reporting period, determined in conformity with Actuarial Standards of Practice based on the most recent measurement available when the contribution for the reporting period was adopted.

2. Actuarial Valuation Date

The date as of which an actuarial valuation is performed. This date may be up to 24 months prior to the measurement date and up to 30 months prior to the employer's reporting date.

3. Deferred Inflow of Resources

An acquisition of net assets by a government employer that is applicable to a future reporting period. In the context of GASB 68, these are experience gains on the Total Pension Liability, assumption changes reducing the Total Pension Liability, or investment gains that are recognized in future reporting periods.

4. Deferred Outflow of Resources

A consumption of net assets by a government employer that is applicable to a future reporting period. In the context of GASB 68, these are experience losses on the Total Pension Liability, assumption changes increasing the Total Pension Liability, or investment losses that are recognized in future reporting periods.

5. Entry Age Actuarial Cost Method

The actuarial cost method required for GASB 67 and 68 calculations. Under this method, the actuarial present value of the projected benefits of each individual included in an actuarial valuation is allocated on a level basis over the earnings of the individual between entry age and assumed exit ages. The portion of this actuarial present value allocated to a valuation year is called the service cost. The portion of this actuarial present value not provided for at a valuation date by the actuarial present value of future service costs is called the Total Pension Liability.

6. Measurement Date

The date as of which the Total Pension Liability and Plan Fiduciary Net Position are measured. The Total Pension Liability may be projected from the actuarial valuation date to the measurement date. The measurement date must be the same as the reporting date for the plan.

APPENDIX A – GLOSSARY OF TERMS

7. Net Pension Liability

The liability of employers and nonemployer contributing entities to employees for benefits provided through a defined benefit pension plan. It is calculated as the Total Pension Liability less the Plan Fiduciary Net Position.

8. Plan Fiduciary Net Position

The fair or Market Value of Assets.

9. Reporting Date

The last day of the plan or employer's fiscal year.

10. Service Cost

The portion of the actuarial present value of projected benefit payments that is attributed to the current period of employee service in conformity with the requirements of GASB 67 and 68. The service cost is the normal cost calculated under the Entry Age Actuarial Cost Method.

11. Total Pension Liability

The portion of the actuarial present value of projected benefit payments that is attributed to past periods of employee service in conformity with the requirements of GASB 67 and 68. The Total Pension Liability is the Actuarial Liability calculated under the Entry Age Actuarial Cost Method. This measurement generally is not appropriate for estimating the cost to settle the Plan's liabilities.
